

Rosemount™ DP Level Transmitters and 1199 Diaphragm Seal Systems

Applications

- Level, flow, pressure, interface, density
- Extreme hot and cold temperatures
- Corrosive, clogging, or viscous processes
- Hygienic requirements
- Special process connections

Proven, reliable, and innovative DP Level technologies

To meet your application requirements, Rosemount DP Level technologies deliver an unsurpassed product offering that is easy to specify, order, and install. The offering includes a wide variety of process connections, direct mount or capillary connections, and materials of construction to address almost any application. If you don't see what you need listed here, ask us. We can create a custom engineered solution to meet your needs.

Access information when you need it with asset tags

Newly shipped devices include a unique QR code asset tag that enables you to access serialized information directly from the device. With this capability, you can:

- Access device drawings, diagrams, technical documentation, and troubleshooting information in your MyEmerson account
- Improve mean time to repair and maintain efficiency
- Ensure confidence that you have located the correct device
- Eliminate the time-consuming process of locating and transcribing nameplates to view asset information

Rosemount Level Transmitters

Level transmitters combine world-class Rosemount pressure instrumentation with direct-mount seals, all in a single integrated model number.

Rosemount 3051SAL, 3051L, and 2051L Level Transmitters

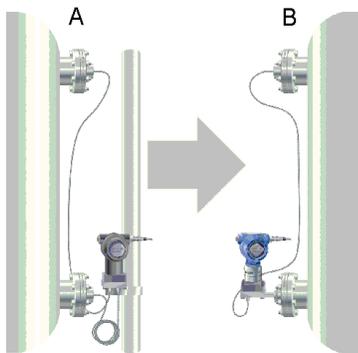

- Achieve best-in-class system reliability with all welded systems
- Wireless configurations provide new data access
- Connect to virtually any process with a comprehensive offering of process connections, fill fluids, direct mount or capillary connections, and materials
- Quantify and optimize total system performance with QZ option

Rosemount Tuned-System™ Assemblies optimize results

Rosemount Tuned-System Assemblies utilize a direct mount seal on the high pressure connection and a remote mount (Capillary) connection on the low pressure connection. This improves overall performance and installation compared to a traditional Balanced Seal System.

Figure 1: Comparison of Balanced System to Tuned-system

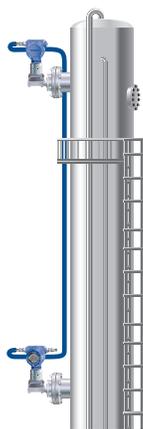

- A. *Balanced system with two equal lengths of capillary*
- B. *Tuned-system assembly with direct mount plus capillary*

- Reduce installed costs by 20 percent by eliminating excess capillary and transmitter mounting hardware
- Improve performance by up to 30 percent
- Increase response time by up to 80 percent
- Reduce risk with up-front quantified performance reports

Rosemount 3051S Electronic Remote Sensor (ERS)™ System

The Rosemount 3051S ERS System is a digital DP Level architecture that links two Rosemount 3051S Pressure Sensors together electronically. The pressure sensors are synchronized on a single power loop where the differential pressure, level, and volume are calculated and transmitted using a standard two-wire 4–20 mA HART® signal.

A digital upgrade to a proven technology

- 90 percent improvement in time response
- Elimination of temperature effects and measurement drift
- Multivariable capabilities including DP, P_{LO}, P_{HI}, volume, and level
- Proven Rosemount 3051S Sensor technology

Simplified installations and maintenance routines

- Elimination of wet legs or dry legs
- Easy installations without need for heat tracing and insulation
- Proactive maintenance and troubleshooting with sensor alerts and diagnostics
- Simplified inventories with sensors and standard cable

Rosemount 1199 Seal Systems

Seal systems provide a reliable process pressure measurement and prevent the process medium from contacting the transmitter diaphragm. Transmitter/diaphragm seal systems should be considered when:

- Process temperature is outside of the operating ranges of the transmitter.
- Process is corrosive and/or requires specific exotic materials of construction.
- Process contains suspended solids or is viscous and is prone to plugging of connections.
- Application requires the use of flush-mount hygienic connections that facilitates CIP/SIP service.
- There is a requirement for easier cleaning of the process from the connections to avoid contamination between batches.

Application flexibility

- Flanged, threaded, and hygienic process connections
- Meets industry standards such as EN 1092-1, ASME B16.5, JIS B2238, ASME B1.20.1, EN 10226-1, GOST 33259-15, ISO 228-1
- Variety of fill fluids applications including cold temperature, hot temperature, and hygienic and food grade
- Three different capillary diameters allow for optimization of accuracy and time response
- Multiple diaphragm coatings for tough applications including corrosion and hydrogen permeation

Reliable system construction

- Welded design with no threaded connections
- 100 percent helium leak tested
- Advanced manufacturing techniques ensure air-free, leak-tight system that is stable over time
- Reliable operation in full vacuum applications

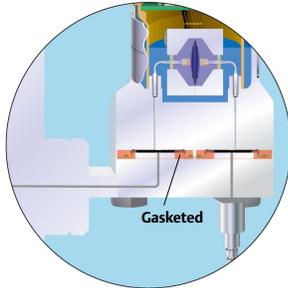

Robust seal design

- Backup convolutions on the diaphragm protect seal integrity

- Recessed diaphragms reduce potential for handling damage

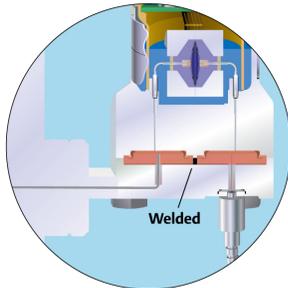

Seal system construction options

Figure 2: Welded-Repairable Construction

- All connection points welded except gasket between sensor module and transmitter flange
- Transmitter can be re-used if repair work is required

Figure 3: All Welded (Vacuum) Construction

- All connection points welded including welded disk over sensor module isolators
- Ideal for vacuum applications (< 6 psia, 400 mbar-a)
- Seal system and transmitter are not repairable

Rosemount 3051S Electronic Remote Sensor (ERS™) System

The Rosemount 3051S ERS System is a flexible, 2-wire, 4-20 mA HART® architecture that calculates differential pressure (DP) electronically using two pressure sensors that are linked together with a non-proprietary electrical wire.

Ideal applications for the Rosemount 3051S ERS System include tall vessels and distillation columns that have traditionally required long lengths of capillary or impulse piping. When used in these types of applications, the Rosemount 3051S ERS System can deliver:

- More accurate and repeatable DP measurements
- Faster time response
- Simplified installations
- Reduced maintenance

VIEW PRODUCT >

Online Product Configurator

Many products are configurable online using our Product Configurator. Select the **Configure** button or visit our [website](#) to start. With this tool's built-in logic and continuous validation, you can configure your products more quickly and accurately.

Specifications and options

See the Specifications and options section for more details on each configuration. Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See the Material selection section for more information.

Model codes

Model codes contain the details related to each product. Exact model codes will vary; an example of a typical model code is shown in [Figure 4](#).

Figure 4: Model Code Example

3051C D 2 X 2 2 M5 B4

1 2

1. Required model components (choices available on most)
2. Additional options (variety of features and functions that may be added to products)

Optimizing lead time

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

How to order

Procedure

1. Choose two Rosemount 3051S ERS Transmitter models. These may be any combination of Rosemount 3051SAM and Rosemount 3051SAL models.

Rosemount 3051SAM

Coplanar

In-line

Rosemount 3051SAL

Coplanar

In-line

2. Decide which model will be the ERS Primary (4–20 mA loop termination and optional LCD display) and which will be the ERS Secondary. This will be specified by the “Configuration Type” code in each model number.

A. *Secondary*

B. *Primary*

3. Specify two full model numbers per the desired configuration.

3051SAM1ST2A2E11A2A

3051SAL1PG4AA1A1020DFF71DA00M5

Rosemount 3051SAM Transmitter for ERS Applications

- Coplanar and in-line sensor module platforms
- Variety of process connections including threaded NPT, flanges, manifolds, and Rosemount 1199 Remote Seals
- Available with 15-year stability and 15-year limited warranty

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment.

Required model components

Model

Code	Description
3051SAM	Scalable ERS Measurement Transmitter

Performance class

The Rosemount 3051S ERS System offers three performance class options; Classic, Ultra, and Enhanced ERS system performance. The Classic and Ultra performance classes are suited to lower static pressure and stable temperature conditions. The Enhanced ERS system performance class provides better performance across temperature (–40 to 185 °F) with improved performance at higher static pressure.

Code	Description	
1	Ultra: 0.025% span accuracy, 200:1 rangedown, 15-year stability, 15-year limited warranty	★
2	Classic: 0.035% span accuracy, 150:1 rangedown, 15-year stability	★
4	Enhanced ERS System performance, 15-year stability, 15-year limited warranty	★

QS	Prior-use certificate of FMEDA Data	★
QT	Safety certified to IEC 61508 with certificate of FMEDA data	★

Surface finish certification

Code	Description	
Q16	Surface finish certification for hygienic remote seals	★

Toolkit performance reports

The QZ report quantifies the performance of the entire ERS system. One report is provided per ERS system. The QZ option is specified on the primary transmitter (configuration type code P).

Code	Description	
QZ	Remote seal system performance calculation report	★

Terminal blocks

This is not available with configuration type code S.

Code	Description	
T1	Transient terminal block	★

Sensor fill fluid

Silicone fill fluid is standard.

Code	Description	
L1	Inert sensor fill fluid	★

O-ring

Code	Description	
L2	Graphite-filled PTFE O-ring	★

Bolting material

Code	Description	
L4	Austenitic 316 SST bolts	★
L5 ⁽¹⁾	ASTM A 193, Grade B7M bolts	★
L6	Alloy K-500 bolts	★
L7 ⁽¹⁾	ASTM A 453, Class D, Grade 660 bolts	★
L8	ASTM A 193, Class 2, Grade B8M bolts	★

(1) *Materials of construction comply with metallurgical requirements highlighted within NACE MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR 0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.*

Display type (ERS primary only)

This is not available with configuration type code S.

Code	Description	
M5	Plantweb™ LCD display	★
M7 ⁽¹⁾	Remote mount LCD display and interface, Plantweb housing, no cable, SST bracket	★
M8	Remote mount LCD display and interface, Plantweb housing, 50 ft. (15.2 m) cable, SST bracket	★

Code	Description	
M9	Remote mount LCD display and interface, Plantweb housing, 100 ft. (30.5 m) cable, SST bracket	★

(1) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.

Pressure testing

Code	Description	
P1	Hydrostatic testing with certificate	

Special cleaning

This is not available with process connection code A11.

Code	Description	
P2	Cleaning for special services	
P3	Cleaning for less than 1 PPM Chlorine/Fluorine	

NACE certificate

Materials of construction comply with metallurgical requirements highlighted within NACE® MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR 0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.

Code	Description	
Q15	Certificate of compliance to NACE MR0175/ISO 15156 for wetted materials	★
Q25	Certificate of compliance to NACE MR0103 for wetted materials	★

Positive material identification (PMI)

Code	Description	
Q76	PMI verification and certificate	★

Rosemount 3051SAL Transmitter for ERS Applications

- Integrated transmitter and direct mount seal in a single model number
- Variety of process connections including flanged, threaded, and hygienic remote seals
- Available with 15-year limited warranty

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment.

A Rosemount 3051SAL Scalable ERS Level Transmitter consists of three parts. First, specify the transmitter model codes found below. Finish the model number by specifying all desired options from the Additional Options section.

Required model components

Model

Code	Transmitter type
3051SAL	Scalable level transmitter

Performance class

The Rosemount 3051S ERS System offer three performance class options; Classic, Ultra, and Enhanced ERS system performance. The Classic and Ultra performance classes are suited to lower static pressure and stable temperature conditions. The Enhanced ERS system performance class provides better performance across temperature (–40 to 185 °F) with improved performance at higher static pressure.

Code	Description
1	Ultra: 0.055% span accuracy, 150:1 rangedown, 15-year limited warranty ★
2	Classic: 0.065% span accuracy, 150:1 rangedown ★
4	Enhanced ERS system performance, 15-year limited warranty ★

Configuration type

Code	Description
P	ERS - primary ★
S	ERS - secondary ★

Pressure type

Code	Description	
	Module	Sensor
G	Coplanar	Gauge ★
T	In-Line	Gauge ★
E	In-Line	Absolute ★
A	Coplanar	Absolute

Pressure range

The pressure range should be specified based on the maximum static pressure, not differential pressure.

Code	Description			
	Coplanar gauge	In-line gauge	In-line absolute	Coplanar absolute
1A	N/A	–14.7 to 30 psig (–1.01 to 2.06 bar)	0 to 30 psia (0 to 2.06 bar)	0 to 30 psia (0 to 2.06 bar) ★
2A	–250 to 250 inH ₂ O (–621.60 to 621.60 mbar)	–14.7 to 150 psig (–1.01 to 10.34 bar)	0 to 150 psia (0 to 10.34 bar)	0 to 150 psia (0 to 10.34 bar) ★
3A	–393 to 1000 inH ₂ O (–0.97 to 2.48 bar)	–14.7 to 800 psig (–1.01 to 55.15 bar)	0 to 800 psia (0 to 55.15 bar)	0 to 800 psia (0 to 55.15 bar) ★

Code	Description				
	Coplanar gauge	In-line gauge	In-line absolute	Coplanar absolute	
4A	-14.2 to 300 psig (-0.97 to 20.68 bar)	-14.7 to 4000 psig (-1.01 to 275.79 bar)	0 to 4000 psia (0 to 275.79 bar)	0 to 4000 psia (0 to 275.79 bar)	★
5A	-14.2 to 2000 psig (-0.97 to 137.89 bar)	-14.7 to 10000 psig (-1.01 to 689.47 bar)	0 to 10000 psia (0 to 689.47 bar)	N/A	★

Transmitter output

Code	Description	
A	4–20 mA with digital signal based on HART® protocol	★

Housing style

Code	Description	Material	Conduit entry size	
Housings for ERS primary - configuration type code P				
1A	Plantweb™ housing	Aluminum	½–14 NPT	★
1B	Plantweb housing	Aluminum	M20 x 1.5 (CM 20)	★
1J	Plantweb housing	SST	½–14 NPT	★
1K	Plantweb housing	SST	M20 x 1.5 (CM 20)	★
2E	Junction box with remote display output	Aluminum	½–14 NPT	★
2F	Junction box with remote display output	Aluminum	M20 x 1.5 (CM 20)	★
2M	Junction box with remote display output	SST	½–14 NPT	★
1C	Plantweb housing	Aluminum	G½	
1L	Plantweb housing	SST	G½	
2G	Junction box with remote display output	Aluminum	G½	
Housings for ERS secondary - configuration type code S				
2A	Junction box	Aluminum	½–14 NPT	★
2B	Junction box	Aluminum	M20 x 1.5 (CM 20)	★
2J	Junction box	SST	½–14 NPT	★
2C	Junction box	Aluminum	G½	

Seal system type

See Seal system type in Rosemount DP Level [Product Data Sheet](#) for more detail.

Code	Description		
Coplanar pressure module type			
1	Single direct mount seal system	Welded-repairable	★
2	Single direct mount seal system	All welded	★

Code	Description

Continue specifying a completed model number by choosing a remote [Seal style](#):

- (1) At ambient pressure of 14.7 psia (1 bar-a) and ambient temperature of 70 °F (21 °C). Temperature limits are reduced in vacuum service and may be limited by seal selection.
- (2) Due to heat transfer to the transmitter, the maximum process temperature of the transmitter will be de-rated if ambient or process temperatures exceed 185 °F (85 °C). Consult Instrument Toolkit™ to verify the application.
- (3) For complete process and ambient temperature limits, see Thermal Range Expander temperature operating range.
- (4) This is a food grade fill fluid.
- (5) Not suitable for vacuum applications.
- (6) Only available with Thermal Range Expander.
- (7) UltraTherm 805 supports maximum design temperature of 454 °C (850 °F). Design temperature rating is for non-continuous use with a cumulative exposure time less of than 12 hours.

Seal style

Seal type	Model	Process connection
	Flush Flanged (FF) Seal	2-in./DN 50/50A 3-in./DN 80/80A 4-in./ DN 100/100A

KC	FM and ATEX Explosion-proof, Intrinsically Safe, Division 2	★
KD ⁽¹⁾	FM, CSA, and ATEX Explosion-proof, Intrinsically Safe	★

(1) Not available with M20 or G½ conduit entry size.

Shipboard approvals

Code	Description	
SBS	American Bureau of Shipping (ABS) Type Approval	★
SBV	Bureau Veritas (BV) Type Approval	★
SDN	Det Norske Veritas (DNV) Type Approval	★
SLL	Lloyds Register (LR) Type Approval	★

Sensor fill fluid

Silicone fill fluid is standard.

Code	Description	
L1	Inert sensor fill fluid	★

O-ring

Code	Description	
L2	Graphite-filled PTFE O-ring	★

Bolting material

Code	Description	
L4	Austenitic 316 SST bolts	★

Display type (ERS primary only)

This is not available with configuration type code S.

Code	Description	
M5	Plantweb™ LCD display	★
M7 ⁽¹⁾	Remote mount LCD display and interface, Plantweb housing, no cable, SST bracket	★
M8	Remote mount LCD display and interface, Plantweb housing, 50 ft. (15.2 m) cable, SST bracket	★
M9	Remote mount LCD display and interface, Plantweb housing, 100 ft. (30.5 m) cable, SST bracket	★

(1) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.

Pressure testing

Code	Description
P1	Hydrostatic testing with certificate

Special cleaning

This is not available with process connection code A11.

Code	Description
P2	Cleaning for special services
P3	Cleaning for less than 1 PPM Chlorine/Fluorine

Calibration certification

Code	Description
Q4	Calibration certificate
QP	Calibration certificate and tamper evident seal

Material traceability certification

Code	Description
Q8	Material traceability certification per EN 10204 3.1

Quality certification for safety

Code	Description
QS	Prior-use certificate of FMEDA Data
QT	Safety certified to IEC 61508 with certificate of FMEDA data

Toolkit performance reports

The QZ report quantifies the performance of the entire ERS system. One report is provided per ERS system. The QZ option is specified on the primary transmitter (configuration type code P).

Code	Description
QZ	Remote seal system performance calculation report

Transient protection

This is not available with configuration type code S.

Code	Description
T1	Transient terminal block

NACE certificate

Materials of construction comply with metallurgical requirements highlighted within NACE MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR 0103 for sour refining environments. UltraTherm 805 supports maximum design temperature of 850 °F (454 °C). Design temperature rating is for non-continuous use with a cumulative exposure time less of than 12 hours.

Code	Description	
Q15	Certificate of compliance to NACE MR0175/ISO 15156 for wetted materials	★
Q25	Certificate of compliance to NACE MR0103 for wetted materials	★

Positive material identification (PMI)

Code	Description	
Q76	PMI verification and certificate	★

Rosemount 3051S Scalable™ Level Transmitter

Rosemount 3051S Scalable Level Transmitters combine the features and benefits of a high-performance Rosemount 3051S with the durability and reliability of diaphragm seals all in a single model number.

Rosemount 3051SAL In-line with "FF" Flanged Seal

Rosemount 3051SAL Coplanar with "SS" Hygienic Tank Spud Seal

Rosemount 3051SAL Tuned-System™ Assembly with Thermal Range Expander

Rosemount 3051SAL Balanced System

Product features and capabilities include:

- Variety of process connections including flanged, threaded, and hygienic seals
- Quantified performance for the entire transmitter/seal assembly (QZ option)
- HART®, FOUNDATION™ Fieldbus, and wireless protocols

Rosemount 3051SAL Scalable Level Transmitter

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment.

A Rosemount 3051SAL Scalable ERS Level Transmitter consists of three parts. First, specify the transmitter model codes found below. Then, specify a direct mount seal found here: [Diaphragm seals for Rosemount 3051SAL](#). Finish the model number by specifying all desired options from the Additional Options section.

Online Product Configurator

Many products are configurable online using our Product Configurator. Select the **Configure** button or visit our [website](#) to start. With this tool's built-in logic and continuous validation, you can configure your products more quickly and accurately.

Specifications and options

See the Specifications and options section for more details on each configuration. Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See the Material selection section for more information.

Model codes

Model codes contain the details related to each product. Exact model codes will vary; an example of a typical model code is shown in Figure 5.

Figure 5: Model Code Example

3051C D 2 X 2 2 M5 B4

- (1) Requires separate Rosemount 1199 model number to be selected. With option code 1, user must select Seal Location Option code M (low side of transmitter) in the Rosemount 1199 Remote Mount Seal System Model.
- (2) Not suitable for vacuum applications.
- (3) PVC coating should not be exposed to temperatures above 212°F (100°C) to avoid possibility of thermal breakdown.

Capillary length

Capillary length applies to both high and low side for balanced systems. Applies to low side only for tuned-system assemblies. Applies to high side only for remote mount single seal systems with capillary.

Code	Description	
0	No capillary (required for direct mount single seal system)	★

Continue specifying a completed model number by choosing a remote [Seal style](#):

- (1) At ambient pressure of 14.7 psia (1 bar-a) and ambient temperature of 70 °F (21 °C). Temperature limits are reduced in vacuum service and may be limited by seal selection.
- (2) Due to heat transfer to the transmitter, the maximum process temperature of the transmitter will be de-rated if ambient or process temperatures exceed 185 °F (85 °C). Consult Instrument Toolkit™ to verify the application.
- (3) For complete process and ambient temperature limits, see Thermal Range Expander temperature operating range.
- (4) This is a food grade fill fluid.
- (5) Not suitable for vacuum applications.
- (6) Only available with Thermal Range Expander.
- (7) UltraTherm 805 supports maximum design temperature of 454 °C (850 °F). Design temperature rating is for non-continuous use with a cumulative exposure time less of than 12 hours.

Seal style

Seal type	Model	Process connection
	Flush Flanged (FF) Seal	2-in./DN 50/50A 3-in./DN 80/80A 4-in./ DN 100/100A

Wireless options

Update rate

This is only available with output code X.

Code	Description	
WA	User configurable update rate	★

Operating frequency and protocol

Code	Description	
3	2.4 GHz DSSS, IEC 62591 (<i>WirelessHART</i> ®)	★

Omni-directional wireless antenna

Code	Description	
WK	External antenna	★
WM	Extended range, external antenna	★
WN	High-gain, remote antenna	

SmartPower

Long-life power module must be shipped separately, order power module 701PBKKF. This is not available with output code A.

Code	Description	
1	Adapter for Black Power Module (I.S. Power Module sold separately)	★

Additional options

HART® Revision configuration (requires HART Protocol output code A)

Option HR7 configures the HART output to HART Revision 7. This option requires the selection of the Advanced Diagnostics (DA2) option. The device with this option can be field configured to HART Revision 5 or 7 if desired.

Code	Description	
HR7	Configured for HART Revision 7	★

Extended product warranty

Code	Description	
WR3	3-year limited warranty	★
WR5	5-year limited warranty	★

Plantweb control functionality

This is not available with output code A and X. With option code 10, user must select seal location option code M in Rosemount DP Level [Product Data Sheet](#). Requires FOUNDATION™ Fieldbus output code F.

Code	Description	
A01	Foundation Fieldbus advanced control function block suite	★

Diagnostics suite

Code	Description	
D01 ⁽¹⁾	FOUNDATION™ Fieldbus diagnostics suite (Process Intelligence, Plugged Impulse Line diagnostic)	★
DA2 ⁽²⁾	Advanced HART® diagnostics suite (Process Intelligence, Loop Integrity, Plugged Impulse Line diagnostic, Process Alerts, Service Alerts, Variable Log, Event Log)	★

(1) This is not available with output code X and A.

(2) Requires Plantweb housing and output code A. Includes hardware adjustments as standard.

Mounting bracket

Code	Description	
B4	Bracket, all SST, 2-in. pipe panel	★
BE	Bracket, 316 SST, B4-style with 316 SST bolting	★

Software configuration

This is not available with output code F.

Code	Description	
C1	Custom software configuration (requires Configuration Data Sheet)	★

Gauge pressure calibration

Code	Description	
C3	Gauge pressure calibration on Rosemount 3051SAL A4 only	★

Alarm limit

This is not available with output code F and X.

Code	Description	
C4	NAMUR alarm and saturation levels, high alarm	★
C5	NAMUR alarm and saturation levels, low alarm	★
C6	Custom alarm and saturation signal levels, high alarm (requires C1 and Configuration Data Sheet)	★
C7	Custom alarm and saturation signal levels, low alarm (requires C1 and Configuration Data Sheet)	★
C8	Low alarm (standard Rosemount alarm and saturation levels)	★

Hardware adjustments

This is not available with output code F, X, and housing style codes 00, 2E, 2F, 2G, 2M, 5A, 5J, or 7J.

Code	Description	
D1	Hardware adjustments (zero, span, alarm, security)	★

Flange adapter

Code	Description	
D2	½–14 NPT flange adapter	★
D9	RC½ SST flange adapter	

Ground screw

This assembly is included with options EP, KP, E1, N1, K1, ND, E4, E7, N7, K7, E2, E3, KA, KC, KD, IA, IB, IE, IF, IG, KG, T1, K2, N3, EM, and KM.

Code	Description	
D4	External ground screw assembly	★

Drain/vent valve

Code	Description	
D5	Delete transmitter drain/vent valves (install plugs)	★

Conduit plug

Transmitter is shipped with 316 SST conduit plug (uninstalled) in place of standard aluminum conduit plug.

Code	Description	
DO	316 SST conduit plug	★

Product certifications

Valid when SuperModule Platform and housing have equivalent approvals.

Code	Description	
E1	ATEX Flameproof	★
I1	ATEX Intrinsic Safety	★
IA	ATEX FISCO Intrinsic Safety (FOUNDATION Fieldbus protocol only)	★

L8	ASTM A 193, Class 2, Grade B8M bolts	★

(1) *Materials of construction comply with metallurgical requirements highlighted within NACE MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR 0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.*

Display type

See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information. Not available with output code A and housing code 01 or 7J.

Code	Description	
M5 ⁽¹⁾	Plantweb LCD display	★
M7	Remote mount LCD display and interface, Plantweb housing, no cable, SST bracket	★
M8	Remote mount LCD display and interface, Plantweb housing, 50 ft. (15 m) cable, SST bracket	★
M9	Remote mount LCD display and interface, Plantweb housing, 100 ft. (31 m) cable, SST bracket	★

(1) *See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.*

Pressure testing

Code	Description	
P1	Hydrostatic testing with certificate	

Special cleaning

This is not available with process connection code A11.

Code	Description
P2	Cleaning for special services
P3	Cleaning for less than 1 PPM Chlorine/Fluorine

Calibration certification

Code	Description
Q4	Calibration certificate
QP	Calibration certificate and tamper evident seal

Material traceability certification

Code	Description
Q8	Material traceability certification per EN 10204 3.1

Quality certification for safety

Code	Description
QS ⁽¹⁾	Prior-use certificate of FMEDA Data
QT ⁽²⁾	Safety-certified to IEC 61508 with certificate of FMEDA data

(1) Not available with output code X and F.

(2) Not available with output code F or X. Not available with housing code 7J.

Toolkit performance reports

Code	Description
QZ	Remote seal system performance calculation report

Transient protection

The T1 option is not needed with FISCO Product Certifications; transient protection is included in the FISCO product certification codes IA, IB, IE, IF, and IG. Not available with Housing code 5A, 5J, or 7J.

Code	Description
T1	Transient terminal block

Conduit electrical connector

This is not available with Housing code 5A, 5J, or 7J. Available with Intrinsically Safe approvals only. For FM Intrinsically Safe; Nonincendive (option code I5) or FM FISCO Intrinsically Safe (option code IE), install in accordance with Rosemount drawing 03151-1009.

Code	Description	
GE	M12, 4-pin, male connector (eurofast)	★
GM	A size mini, 4-pin, male connector (minifast)	★

NACE certificate

Materials of construction comply with metallurgical requirements highlighted within NACE® MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR 0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.

Code	Description	
Q15	Certificate of compliance to NACE MR0175/ISO 15156 for wetted materials	★
Q25	Certificate of compliance to NACE MR0103 for wetted materials	★

Positive material identification (PMI)

Code	Description	
Q76	PMI verification and certificate	★

Diaphragm seals for Rosemount 3051SAL

Flush Flanged (FF) Seal

- Most common seal
- Good for use in general applications
- Easy installation on flanged connections ranging from 2-in. (DN 50) to 4-in. (DN 100)

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment.

Required model components

Remote Flanged (RF) Seal

- Designed to improve performance on smaller process connections
- Easy installation on flanged connections ranging from ½- to 1½-in. (DN 25– DN 40)
- Lower housing/flushing ring required

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment.

Rosemount 3051L Level Transmitter ordering information

The Rosemount 3051L Level Transmitter combines the performance and capabilities of Rosemount 3051 Transmitters with the reliability and quality of a direct mount seal in one model number. Rosemount 3051L Level Transmitters offer a variety of process connections, configurations, and fill fluid types to meet a breadth of level applications. Capabilities of a Rosemount 3051L Level Transmitter include:

- Quantify and optimize total system performance (option code QZ).
- Tuned-System assembly (option code S1).
- The Loop Integrity Diagnostic continuously monitors the electrical loop to detect changes that compromise the integrity of the transmitted 4-20 mA output signal (Option Code DA0).
- LOI with straightforward menus and built-in configuration buttons (option code M4).

[CONFIGURE >](#) [VIEW PRODUCT >](#)

Online Product Configurator

Many products are configurable online using our Product Configurator. Select the **Configure** button or visit our [website](#) to start. With this tool's built-in logic and continuous validation, you can configure your products more quickly and accurately.

Specifications and options

See the Specifications and options section for more details on each configuration. Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See the Material selection section for more information.

Model codes

Model codes contain the details related to each product. Exact model codes will vary; an example of a typical model code is shown in [Figure 6](#).

Figure 6: Model Code Example

3051C D 2 X 2 2 M5 B4

1 2

1. Required model components (choices available on most)
2. Additional options (variety of features and functions that may be added to products)

Optimizing lead time

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Required model components

Model

Code	Description	
3051L	Level transmitter	★

Pressure range

Code	Description	
2	-250 to 250 inH ₂ O (-621.60 to 621.60 mbar)	★
3	-1000 to 1000 inH ₂ O (-2.48 to 2.48 bar)	★
4	-300 to 300 psi (-20.68 to 20.68 bar)	★

Transmitter output

Code	Description	
A ⁽¹⁾	4–20 mA with digital signal based on HART Protocol	★
F	FOUNDATION Fieldbus Protocol	★
W ⁽²⁾	PROFIBUS PA Protocol	★
X ⁽³⁾	Wireless (requires wireless options and engineered polymer housing)	★
M ⁽⁴⁾	Low-power 1–5 Vdc with digital signal based on HART Protocol	

- (1) Option HR5 configures the HART output to HART Revision 5. Option HR7 configures the HART output to HART Revision 7. The device can be field configured to HART Revision 5 or 7 if desired. HART Revision 5 is the default HART output.
- (2) Option code M4 - LCD display with LOI required for local addressing and configuration.
- (3) Requires wireless options and engineered polymer housing. Available approvals are FM Intrinsically Safe, (option code I5), CSA Intrinsically Safe (option code I6), ATEX Intrinsic Safety (option code I1), IECEx Intrinsic Safety (option code I7), and EAC Intrinsic Safety (option code IM).
- (4) Only available with C6, E2, E5, I5, K5, KB, and E8 approval. Not available with GE, GM, SBS, DA0, M4, D4, DZ, QT, HR5, HR7, CR, CS, or CT.

K	SST	M20 x 1.5	★
p ⁽¹⁾	Engineered polymer	No conduit entries	★
D ⁽²⁾	Aluminum	G½	
M ⁽²⁾	SST	G½	

(1) Only available with wireless output code X.

(2) Transmitter conduit entry will be ½ NPT and a ½ NPT to G½ thread adapter will be provided. Not available with product certifications options E8, K8, E5, K5, C6, K6, E7, K7, E2, K2, E3, KB, or KD.

Wireless options

Requires wireless output code X and Engineered Polymer Housing code P.

Wireless transmit rate, operating frequency, and protocol

Code	Description	
WA3	User configurable transmit rate, 2.4 GHz <i>Wireless</i> HART	★

Antenna and SmartPower

Code	Description	
WPS	Internal antenna, compatible with Green Power Module (I.S. Power Module sold separately)	★

Additional options

Include with selected model number.

Extended product warranty

Code	Description	
WR3	3-year limited warranty	★
WR5	5-year limited warranty	★

Plantweb control functionality

Code	Description	
A01	FOUNDATION Fieldbus control function block suite	★

Plantweb diagnostic functionality

Code	Description	
DA0	Loop Integrity HART Diagnostic	★
D01	FOUNDATION Fieldbus Diagnostics Suite	★

Seal assemblies

“Assemble-to” items are specified separately and require a completed model number.

Code	Description	
S1	Assembled to one Rosemount 1199 Seal	★

Remote seal diaphragm coating

Code	Description	
SZ	0.0002-in. (5 µm) gold-plated diaphragm	
FP ⁽¹⁾	CorrosionShield PFA coated diaphragm	

(1) *Not compatible with spiral wound gasket.*

- (1) Dust approval not applicable to output code X. See [C5 Custody Transfer - Measurement Canada Accuracy Approval](#) for wireless approvals.
- (2) Only available with output codes A - 4-20 mA HART, F - FOUNDATION Fieldbus, and W - PROFIBUS PA. Also only available with G½ housing thread types.
- (3) Nonincendive certification not provided with Wireless output option code (X).
- (4) Panel mounting bolts are not supplied.
- (5) Only available with HART 4-20 mA output (code A), FOUNDATION Fieldbus output (code F), and Low Power output (code M) and with housing codes A, B, E, F, J, and K. Not available with codes DZ, V5, GE, GM, BR5, or BR6.
- (6) Only available with HART 4-20 mA output (code A), FOUNDATION Fieldbus output (code F), Wireless output (code X), and PROFIBUS-PA output (code W) and with housing codes A, B, E, F, J, K, and P. Not available with codes V5, GE, or GM.
- (7) Only available with HART 4-20 mA output (code A) and FOUNDATION Fieldbus output (code F) and housing codes A, B, E, F, J, and K. Not available with codes DAO, DZ, V5, GE, GM, or BR6.

Shipboard approvals

Shipyard approvals are not available with wireless output (code X).

Code	Description	
SBS	American Bureau of Shipping	★
SBV ⁽¹⁾	Bureau Veritas (BV)	★
SDN	Det Norske Veritas	★
SLL ⁽¹⁾	Lloyds Register (LR)	★

- (1) Only available with product certifications E7, E8, I1, I7, IA, K7, K8, KD, N1, N7

Bolting material

Code	Description	
L4	Austenitic 316 SST bolts	★
L5	ASTM A 193, grade B7M bolts	★
L6	Alloy K-500 Bolts	★

Code	Description	
L8	ASTM A 193 Class 2, grade B8M bolts	★

Display and interface options

Code	Description	
M4 ⁽¹⁾	LCD display with LOI	★
M5	LCD display	★

(1) Only available with 4-20 mA HART output (code A) and PROFIBUS-PA (code W).

Calibration certificate

Code	Description	
Q4	Calibration Certificate	★
QG ⁽¹⁾	Calibration Certificate and GOST Verification Certificate	★
QP	Calibration certification and tamper evident seal	★

(1) Contact an Emerson representative for availability.

Material traceability certification

Code	Description	
Q8	Material Traceability Certification per EN 10204 3.1	★

Positive material identification (PMI)

Code	Description	
Q76	PMI verification and certificate	★

Quality certification for safety

The quality certification for safety is only available with HART 4–20 mA output (code A).

Code	Description	
QS	Prior-use certificate of FMEDA data	★
QT	Safety certified to IEC 61508 with certificate of FMEDA	★

Toolkit total system performance reports

Code	Description	
QZ	Remote seal system performance calculation report	★

Conduit electrical connector

The conduit electrical connector option is not available with wireless output (code X).

Code	Description	
GE	M12, 4-pin, male connector (eurofast®)	★
GM	A size mini, 4-pin, male connector (minifast®)	★

Configuration buttons

Code	Description	
D4 ⁽¹⁾	Analog zero and span	★
DZ ⁽²⁾	Digital zero trim	★

(1) Only available with HART 4–20 mA output (code A).

(2) Only available with HART 4–20 mA output (output code A) and wireless output (output code X)

Transient protection

The transient protection option is not available with wireless output (code X). The T1 option is not needed with FISCO Product Certifications; transient protection is included in the FISCO product certification codes IA, IB, and IE.

Code	Description	
T1	Transient protection terminal block	★

Software configuration

The software configuration option is only available with HART 4–20 mA output (output code A) and wireless output (output code X).

Code	Description	
C1	Custom software configuration (For wired, see the Rosemount 3051 Configuration Data Sheet . For wireless, see the Rosemount 3051 Wireless Configuration Data Sheet .)	★

Low power output

Code	Description	
C2	0.8–3.2 Vdc output with digital signal based on HART Protocol (available with output code M only)	★

Alarm levels

The alarm levels option is only available with HART 4–20 mA output (code A).

Code	Description	
C4 ⁽¹⁾	Analog output levels compliant with NAMUR recommendation NE 43, alarm high	★
CN ⁽¹⁾	Analog output levels compliant with NAMUR recommendation NE 43, alarm low	★
CR	Custom alarm and saturation signal levels, high alarm (requires C1 and Rosemount 3051 Configuration Data Sheet)	★
CS	Custom alarm and saturation signal levels, low alarm (requires C1 and Rosemount 3051 Configuration Data Sheet)	★
CT	Rosemount standard low alarm	★

(1) NAMUR-compliant operation is preset at the factory and can be changed to standard operation in the field for the standard Rosemount 3051.

Conduit plug

The conduit plug option is not available with wireless output (code X).

Code	Description	
DO	316 SST conduit plug	★

Ground screw

The ground screw option is not available with wireless output (code X). The V5 option is not needed with the T1 option; external ground screw assembly is included with the T1 option.

Code	Description	
V5	External ground screw assembly	★

Lower housing flushing connection options

Code	Ring material	Number	Size (NPT)	
F1	316 SST	1	¼–18 NPT	★
F2	316 SST	2	¼–18 NPT	★
F3	Alloy C-276	1	¼–18 NPT	★
F4	Alloy C-276	2	¼–18 NPT	★
F7	316 SST	1	½–14 NPT	★
F8	316 SST	2	½–14 NPT	★
F9	Alloy C-276	1	½–14 NPT	★
F0	Alloy C-276	2	½–14 NPT	★

Lower housing intermediate gasket material

Code	Description	
S0	No gasket for lower housing	★
SY ⁽¹⁾	Thermo-Tork® TN-9000	★

(1) Gasket provided when lower housing is ordered.

NACE certificate

Note that NACE®-compliant wetted materials are required. Materials of construction must comply with recommendations per NACE MR0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult the latest standard for details. All selected materials must also conform to NACE MR0103 for sour refining environments.

Code	Description	
Q15	Certificate of Compliance to NACE MR0175/ISO 15156 for wetted materials	★
Q25	Certificate of Compliance to NACE MR0103 for wetted materials	★

HART revision configuration (requires HART Protocol output code A)

HART Revision 5 is the default HART output.

Code	Description	
HR5	Configured for HART Revision 5	★
HR7	Configured for HART Revision 7	★

Wireless power accessory

This option is only available with output code X.

Code	Description	
HS	Hot swap power adapter for power module replacement	

Rosemount 2051L Liquid Level Transmitter

- Designed with a variety of process connections, materials and output protocols to meet diverse application requirements
- Tuned-System Level assembly and direct mounting produce optimal performance for level applications
- SIL 2/3 certified to IEC 61508 (via 3rd party) and prior-use certificate of FMEDA data for safety installations
- Local Operator Interface (LOI) for simple, local commissioning on-site without the use of extra tools or training
- Optimized seal system construction ensures a quality measurement in harsh process conditions

Online Product Configurator

Many products are configurable online using our Product Configurator. Select the **Configure** button or visit our [website](#) to start. With this tool's built-in logic and continuous validation, you can configure your products more quickly and accurately.

Specifications and options

See the Specifications and options section for more details on each configuration. Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See the Material selection section for more information.

Model codes

Model codes contain the details related to each product. Exact model codes will vary; an example of a typical model code is shown in [Figure 7](#).

Figure 7: Model Code Example

3051C D 2 X 2 2 M5 B4

1 2

1. Required model components (choices available on most)
2. Additional options (variety of features and functions that may be added to products)

Optimizing lead time

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Required model components

Model

Code	Description	
2051L	Liquid level transmitter	★

Pressure range

Code	Description	
2	–250 to 250 inH ₂ O (–623 to 623 mbar)	★
3	–1000 to 1000 inH ₂ O (–2.5 to 2.5 bar)	★
4	–300 to 300 psi (–20.7 to 20.7 bar)	★

Transmitter output

Code	Description	
A ⁽¹⁾	4–20 mA with digital signal based on HART® Protocol	★
F	FOUNDATION™ Fieldbus Protocol	★
W	PROFIBUS® PA Protocol	★
X	Wireless	★
M	Low-power, 1–5 Vdc with digital signal based on HART Protocol	

(1) HART Revision 5 is the default HART output. The Rosemount 2051 with Selectable HART can be factory or field configured to HART Revision 7. To order HART Revision 7 factory configured, add option code HR7.

Process connection size

Code	Description	Diaphragm

(1) Not available with low power (output code M).

(2) Only available with output code X.

(3) Not available with FOUNDATION Fieldbus (output code F) or wireless (output code X).

(4) Only valid with FOUNDATION Fieldbus (output code F).

Shipboard approvals

Shipyard approvals are not available with wireless output (code X).

Code	Description	
SBS	American Bureau of Shipping	★
SBV	Bureau Veritas (BV)	★
SDN	Det Norske Veritas	★
SLL	Lloyds Register (LR)	★

Display and interface options

Code	Description	
M4 ⁽¹⁾	LCD display with LOI	★
M5	LCD display	★

(1) Not available with FOUNDATION Fieldbus (output code F) or wireless (output code X).

Flange adapters

This option is not valid with alternate process connection options S3, S4, S5, or S6.

Code	Description	
DF	½–14 NPT flange adapters	★

Conduit plug

Not available with output code X. Transmitter is shipped with 316 SST conduit plug (uninstalled) in place of standard CS conduit plug.

Code	Description	
DO	316 SST conduit plug	★

Ground screw

The V5 option is not needed with the T1 option; external ground screw assembly is included with the T1 option.

Code	Description	
V5	External ground screw assembly	★

Transient protection

Not available with output code X. Not valid with FOUNDATION Fieldbus output code F and wireless output code X. The T1 option is not needed with FISCO Product Certifications; transient protection is included in the FISCO product certification codes IA, E, IF, and IG.

Code	Description	
T1	Transient terminal block	★

Software configuration

Only available with 4–20 mA HART output (codes A) and wireless output (code X).

Code	Description	
C1	Custom software configuration (requires completed Configuration Data Sheet)	★

Alarm limit

Only available with 4–20 mA HART (output codes A and M).

Code	Description	
C4 ⁽¹⁾	NAMUR alarm and saturation levels, high alarm	★
CN ⁽¹⁾	NAMUR alarm and saturation levels, low alarm	★
CR	Custom alarm and saturation signal levels, high alarm (requires C1 and Configuration Data Sheet)	★
CS	Custom alarm and saturation signal levels, low alarm (requires C1 and Configuration Data Sheet)	★
CT	Low alarm (standard Rosemount alarm and saturation levels)	★

(1) NAMUR-Compliant operation is pre-set at the factory.

Calibration certification

Code	Description	
Q4	Calibration certificate	★
QG	Calibration certificate and GOST verification certificate	★
QP	Calibration certificate and tamper evident seal	★

Material traceability certification

Code	Description	
Q8	Material traceability certification per EN 10204 3.1	★

Quality certification for safety

The option is only available with 4–20 mA HART output (code A).

Code	Description	
QS	Prior-use certificate of FMEDA data	★
QZ	Safety certified to IEC 61508 with certificate of FMEDA	★

Toolkit total system performance reports

Code	Description	
QZ	Remote seal system performance calculation report	★

Conduit electrical connector

This option is not available with output code X.

Code	Description	
GE	M12, 4-pin, male connector (eurofast®)	★
GM	A size mini, 4-pin, male connector (minifast®)	★

NACE® certificate

NACE Compliant wetted materials are identified by materials of construction that comply with recommendations per NACE MR0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining).

Code	Description	
Q15	Certificate of compliance to NACE MR0175/ISO 15156 for wetted materials	★
Q25	Certificate of compliance to NACE MR0103 for wetted materials	★

Positive material identification (PMI)

Code	Description	
Q76	PMI verification and certificate	★

Lower housing alignment clamp

Code	Description	
SA	Lower housing alignment clamp	★

Lower housing flushing connection

Code	Ring material	Number	Size (NPT)

(1) Not available with option codes A0, B0, and G0.

Direct mount seal system ordering information

Rosemount 1199 Direct Mount Seals reduce installation costs by eliminating mounting hardware. Their advanced design also minimizes oil volume improving performance.

Product features and capabilities include:

- Direct mount gage or absolute seal system can be used for open or vented to atmosphere tank applications
- Tuned-System™ Assembly order codes can be used to improve performance for DP measurements in closed or pressurized tank applications
- Variety of process connections
- Quantified performance for the entire transmitter/seal assembly (QZ option)

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

Rosemount 1199 Direct Mount Seal

The Rosemount 1199 Direct Mount Seal also requires specification of a Rosemount pressure device. See the appropriate Product Data Sheet for the desired device and include the option indicated in the table below for the configuration desired.

When ordering Rosemount 1199 Direct and Remote Mount Seals, add the correct seal system ordering code to the transmitter or gage model.

Table 1: Seal Attach To Code Per Transmitter or Gauge Model

Rosemount model	Two seals	One seal
3051S_C	B12	B11
3051C	S2	S1
2051C	S2	S1
3051S_T	N/A	B11
3051T, 3051HT, 2051T, 2088	N/A	S1
WPG, SPG	N/A	S1

A Rosemount 1199 Direct Mount Seal consists of two parts. First, specify the direct mount connection model codes, then specify a remote seal. Model codes for both components are listed in the [ordering table](#).

Online Product Configurator

Many products are configurable online using our Product Configurator. Select the **Configure** button or visit our [website](#) to start. With this tool's built-in logic and continuous validation, you can configure your products more quickly and accurately.

Specifications and options

See the Specifications and options section for more details on each configuration. Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See the Material selection section for more information.

Model codes

Model codes contain the details related to each product. Exact model codes will vary; an example of a typical model code is shown in Figure 8.

Remote mount seal system ordering information

Rosemount 1199 Remote Mount Seals are used commonly at the top of the vessel when a DP measurement is required. The capillary that is used is available in three different diameters to optimize time response and reduce temperature effects.

Product features and capabilities include:

- Remote Mount Seals can be used for high temperature applications.
- Remote Mount Seals are used on the low pressure side of the transmitter for Tuned-System Assemblies that can be used for DP measurements in closed or pressurized tank applications.
- Variety of process connections.
- Quantified performance for the entire transmitter/seal assembly (QZ option).

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

Rosemount 1199 Remote Mount Seal

The Rosemount 1199 Remote Mount Seal also requires specification of a Rosemount pressure transmitter. See the appropriate product data sheet for the desired transmitter and include the option indicated in the table below for the configuration desired.

When ordering Rosemount 1199 Direct and Remote Mount Seals, make sure to add the correct seal system ordering code to the transmitter or gauge model.

Table 6: Seal Attach To Code Per Transmitter or Gauge Model

Rosemount model	Two seals	One seal
3051S_C	B12	B11
3051C	S2	S1
2051C	S2	S1
3051S_T	N/A	B11
3051T, 3051HT, 2051T, 2088	N/A	S1
WPG, SPG	N/A	S1

A Rosemount 1199 Remote Mount Seal consists of two parts. First, specify the direct mount connection model codes, then specify a remote seal. Model codes for both components are listed in the ordering table.

Online Product Configurator

Many products are configurable online using our Product Configurator. Select the **Configure** button or visit our [website](#) to start. With this tool's built-in logic and continuous validation, you can configure your products more quickly and accurately.

Specifications and options

See the Specifications and options section for more details on each configuration. Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See the Material selection section for more information.

Model codes

Model codes contain the details related to each product. Exact model codes will vary; an example of a typical model code is shown in Figure 9.

Specifications

Liquid level transmitter specifications

Performance specifications

For zero-based spans, reference conditions, silicone oil fill, glass-filled PTFE O-rings, SST materials, coplanar flange (Rosemount 3051SMV, 3051S_C) or ½–14 NPT (Rosemount 3051S_T) process connections, digital trim values set to equal range points.

Conformance to specification ($\pm 3\sigma$ [Sigma])

Technology leadership, advanced manufacturing techniques, and statistical process control ensure measurement specification conformance to $\pm 3\sigma$ or better.

Reference accuracy

Stated reference accuracy equations include terminal based linearity, hysteresis, and repeatability, but does not include analog output reference accuracy of $\pm 0.005\%$ of span.

Table 14: DP Total Accuracy for Enhanced ERS System Performance

Includes full ambient and temperature range from -40 to 85 °C (-40 to 185 °F) requires two transmitters with identical sensor ranges. Specification are only applicable for spans down to 10:1.

Sensor type	3051SAM_ _G2, 3051SAL_ _G2 250 inH ₂ O (622,1 mbar)	3051SAM_ _G3, 3051SAL_ _G3 1000 inH ₂ O (2488,4 mbar)	3051SAM_ _T1, 3051SAL_ _T1 30 psi (2,1 bar)	3051SAM_ _T2, 3051SAL_ _T2 150 psi (10,34 bar)	3051SAM_ _G4, 3051SAL_ _G4 300 psi (20,7 bar)	3051SAM_ _T3, 3051SAL_ _T3 800 psi (55,2 bar)
Rosemount™ 3051SAM ⁽¹⁾	0.2 inH ₂ O (0,5 mbar)	0.6 inH ₂ O (1,4 mbar)	0.9 inH ₂ O (2,2 mbar)	1.5 inH ₂ O (4,0 mbar)	6.2 inH ₂ O (15 mbar)	7.8 inH ₂ O (19 mbar)
Rosemount 3051SAL with direct mount seal types and sizes below ⁽²⁾ <ul style="list-style-type: none"> ■ FF, FC, PF \geq 2-in./DN50 ■ EF \geq 3-in./DN80 ■ All RT, RF, RC, SS ■ SC \geq 2.5-in. 	2.2 inH ₂ O (5,5 mbar)	2.3 inH ₂ O (5,8 mbar)	3.0 inH ₂ O (7,5 mbar)	3.2 inH ₂ O (8,0 mbar)	6.5 inH ₂ O (16 mbar)	8.3 inH ₂ O (21 mbar)
Rosemount 3051SAL with other seal types and sizes	Consult Instrument Toolkit™ for performance.					

(1) For Rosemount 3051SAM assembled to a Rosemount 1199 Diaphragm Seal, use Rosemount 3051SAL specification for identical seal types and sizes.

(2) For Rosemount 3051SAL with direct mount seals, specification applies to process temperatures from -45 to 205 °C and excludes diaphragm option code SC, 6-mil diaphragm thickness. Seal types outside these parameters will require a Toolkit calculation for performance.

Table 15: DP Reference Accuracy of Rosemount 3051S ERS System

	Ultra	Classic
Two coplanar gage sensors (Rosemount 3051SAM_G)		
Ranges 2–4	$\pm 0.035\%$ of DP span	$\pm 0.049\%$ of DP span
Range 5	$\pm 0.071\%$ of DP span	$\pm 0.092\%$ of DP span

Table 15: DP Reference Accuracy of Rosemount 3051S ERS System (continued)

Two coplanar (Rosemount 3051SAM__A)		
Ranges 1–4	±0.035% of DP span	±0.049% of DP span
Two in-line gage sensors (Rosemount 3051SAM__T) Two in-line absolute sensors (Rosemount 3051SAM__E)		
Ranges 1–4	±0.035% of DP span	±0.049% of DP span
Two liquid level sensors (Rosemount 3051SAL)		
Ranges 1–5	±0.092% of DP span	±0.092% of DP span

Table 16: Reference Accuracy for FOUNDATION™ Fieldbus and Wireless Devices

For FOUNDATION Fieldbus and wireless devices, use calibrated range in place of span.		
Sensor type	Ultra	Classic
Rosemount 3051SAM ⁽¹⁾⁽²⁾	±0.025% of Span For spans less than 10:1, ±(0.005% URL + 0.015% span)	±0.035% of Span. For spans less than 10:1, ±(0.005% URL + 0.015% span)
Rosemount 3051SAL_C	±0.055% of Span. For spans less than 10:1, ±(0.005% URL + 0.015% span)	±0.065% of Span. For spans less than 10:1, ±(0.005% URL + 0.015% span)
Rosemount 3051SMV assembled to Rosemount 1199 (Code B11)	N/A	±0.065% span For spans less than 10:1, +/- (0.005% URL + 0.015% span)
Rosemount 3051L Rosemount 3051C or 3051T assembled to Rosemount 1199 (code S1)	±0.075% of Span. For spans less than 10:1, ±(0.005% URL + 0.025% span)	
Rosemount 2051L Rosemount 2051C or 2051T assembled to Rosemount 1199 (code S1)	±0.075% of Span. For spans less than 10:1, ±(0.005% URL + 0.025% span)	

(1) Stated reference accuracy equations include terminal based linearity, hysteresis, and repeatability, but does not include analog only reference accuracy of ±0.005% of span.

(2) For the Rosemount 3051SAM with 1199 assemble to code B11, use 3051SAL_C specifications.

Warranty

Warranty details can be found in Emerson™ Terms and Conditions of Sale, Document 63445, Rev G (10/06).

Models ⁽¹⁾	Ultra/Enhanced	Classic
Rosemount 3051SAM	15-year limited warranty ⁽²⁾	1-year limited warranty ⁽³⁾

(1) Warranty details can be found in Emerson Terms and Conditions of Sale, Document 63445, Rev G (10/06).

(2) Rosemount Ultra transmitter has a limited warranty of fifteen (15) years from date of shipment. All other provisions of Emerson standard limited warranty remains the same.

(3) Goods are warranted for twelve (12) months from the date of initial installation or eighteen (18) months from the date of shipment by seller, whichever period expires first.

Dynamic performance

Rosemount Level Transmitters

Rosemount 3051SAL_C, 3051L, and 2051L models - have an 4–20 mA HART® (1–5 Vdc HART Low Power) update rate of 22 updates per second.

ERS Systems

Rosemount 3051SAM, 3051SAL_P, and 3051SAL_S models - have an 4–20 mA HART (1–5 Vdc HART Low Power) update rate of 11 updates per second. See [Rosemount 3051SAL_C Wireless self-organizing networks](#) for *WirelessHART*® update rates. For total response time, see Instrument Toolkit™.

Ambient temperature effect

See Instrument Toolkit.

Mounting position effects

With liquid level remote mount seal in vertical plane, zero shift of up to ± 1 inH₂O (2,49 mbar); with remote mount seal in horizontal plane, zero shift of up to ± 5 inH₂O (12,45 mbar) plus extension length on extended units; all zero shifts can be zeroed; no span effect.

Vibration effect

Rosemount 3051SAM 3051SAL Less than $\pm 0.1\%$ of URL when tested per the requirements of IEC60770-1 field or pipeline with high vibration level (10–60 Hz 0.21mm displacement peak amplitude/60–2000 Hz 3g).

For Housing Style codes 1J, 1K, 1L, 2J, and 2M: Less than $\pm 0.1\%$ of URL when tested per the requirements of IEC60770-1 field with general application or pipeline with low vibration level (10–60 Hz 0.15 mm displacement peak amplitude/60–500 Hz 2g).

Rosemount 3051L Measurement effect due to vibrations is negligible except at resonance frequencies. When at resonance frequencies, vibration effect is less than $\pm 0.1\%$ of URL per g when tested between 15 and 2000 Hz in any axis relative to pipe-mounted process conditions.

Rosemount 2051L Less than $\pm 0.1\%$ of URL when tested per the requirements of IEC60770-1 field or pipeline with high vibration level (10–60 Hz 0.21 mm displacement peak amplitude/60–2000 Hz 3 g)

Power supply effect

Less than ± 0.005 percent of calibrated span per volt.

Transient protection (option T1)

Rosemount 3051SAM 3051SAL Meets IEEE C62.41.2-2002, Location Category B 6 kV crest (0.5 μ s–100 kHz) 3 kA crest (8 \times 20 microseconds) 6 kV crest (1.2 \times 50 microseconds).

Rosemount 3051L Meets IEEE C62.41, Category B 6 kV crest (0.5 μ s–100 kHz) 3 kV crest (8 \times 20 microseconds) 6 kV crest (1.2 \times 50 microseconds).

Rosemount 2051L Meets IEEE C62.41, Location Category B 6 kV crest (0.5 μ s–100 kHz) 3 kV crest (8 \times 20 microseconds) 6 kV crest (1.2 \times 50 microseconds).

Electromagnetic compatibility (EMC)

Meets all industrial environment requirements of EN61326 and NAMUR NE-21. Maximum deviation < 1% Span during EMC disturbance.

Rosemount 3051S

Note

NAMUR NE-21 does not apply to Wireless (Transmitter output code X) or FOUNDATION™ Fieldbus (Transmitter output code F) or ERS configurations or Junction Box or Remote Display (housing styles 2A-2C, 2E-2G, 2J, 2M).

Note

During surge event, device may exceed maximum EMC deviation limit or reset; however, device will self-recover and return to normal operation within specified start-up time.

Note

During ESD event, Wireless device (Transmitter output code X) may exceed maximum EMC deviation limit or reset, however, device will self-recover and return to normal operation within specified start-up time.

Note

For devices with Junction Box housing or Remote Display (housing styles 2A-2C, 2E-2G, 2J, 2M) testing performed with shielded cable.

Rosemount 3051L/2051L**Note**

NAMUR NE-21 does not apply to Low-Power (Transmitter output option code M) or Wireless (Transmitter output code X).

Note

During surge event, device with 4-20mA (Transmitter output option code A) may exceed maximum EMC deviation limit or reset; however, device will self-recover and return to normal operation within specified start-up time.

Functional specifications**Range and sensor limits****Table 17: Rosemount 3051SAM__G, 3051SAL__D, 3051SAL__G**

Range	Minimum span		Range limits		
	Ultra	Classic	Upper (URL)	Lower (LRL)	
				3051SAL_G ⁽¹⁾⁽²⁾	3051SAL_D ⁽¹⁾
2	1.3 inH ₂ O (3,11 mbar)	2.5 inH ₂ O (6,23 mbar)	250.0 inH ₂ O (0,62 bar)	-250.0 inH ₂ O (-0,62 bar)	-250.0 inH ₂ O (-0,62 bar)
3	5.0 inH ₂ O (12,4 mbar)	10.0 inH ₂ O (24,9 mbar)	1000.0 inH ₂ O (2,49 bar)	-393.0 inH ₂ O (-979 mbar)	-1000.0 inH ₂ O (-2,49 bar)
4	1.5 psi (103,4 mbar)	3.0 psi (206,8 mbar)	300.0 psi (20,7 bar)	-14.2 psig (-979 mbar)	-300.0 psi (-20,7 bar)
5	10.0 psi (689,5 mbar)	20.0 psi (1,38 bar)	2000.0 psi (137,9 bar)	-14.2 psig (-979 mbar)	-2000.0 psi (-137,9 bar)

(1) When specifying a Rosemount 3051SAL Ultra, use Classic minimum span. Minimum span limits may also be limited by the remote seal that is specified with the system.

(2) Assumes atmospheric pressure of 14.7 psig (1 bar).

Table 18: Rosemount 3051SAM__A, 3051SAL__A

When specifying a Rosemount 3051SAL Ultra, use Classic minimum span. Minimum span limits may also be limited by the remote seal that is specified with the system.

Range	Minimum span		Range and sensor limits	
	Ultra	Classic	Upper (URL)	Lower (LRL)
1	0.3 psia (20,7 mbar)	0.3 psia (20,7 mbar)	30 psia (2,07 bar)	0 psia (0 bar)
2	0.75 psia (51,7 mbar)	1.5 psia (0,103 bar)	150 psia (10,34 bar)	0 psia (0 bar)
3	4 psia (275,8 mbar)	8 psia (0,55 bar)	800 psia (55,16 bar)	0 psia (0 bar)
4	20 psia (1,38 bar)	40 psia (2,76 bar)	4000 psia (275,8 bar)	0 psia (0 bar)

Table 19: Rosemount 3051SAM__T, 3051SAM__E, 3051SAL__T, 3051SAL__E

Range	Minimum span		Range and sensor limits		
	Ultra	Classic	Upper (URL)	Lower (LRL) (Abs.)	Lower ⁽¹⁾ (LRL) (Gage)
1	0.3 psi (20,7 mbar)	0.3 psi (20,7 mbar)	30 psi (2,07 bar)	0 psia (0 bar)	-14.7 psig (-1,01 bar)
2	0.75 psi (51,7 mbar)	1.5 psi (0,103 bar)	150 psi (10,34 bar)	0 psia (0 bar)	-14.7 psig (-1,01 bar)
3	4 psi (275,8 mbar)	8 psi (0,55 bar)	800 psi (55,16 bar)	0 psia (0 bar)	-14.7 psig (-1,01 bar)
4	20 psi (1,38 bar)	40 psi (2,76 bar)	4000 psi (275,8 bar)	0 psia (0 bar)	-14.7 psig (-1,01 bar)
5	1000 psi (68,9 bar)	2000 psi (137,9 bar)	10000 psi (689,5 bar)	0 psia (0 bar)	-14.7 psig (-1,01 bar)

(1) Assumes atmospheric pressure of 14.7 psig (1 bar).

Table 20: Rosemount 3051L

Range	Minimum span	Range and sensor limits		
		Upper (URL)	Lower (LRL)	
			Rosemount 3051L Differential	Rosemount 3051L Gage ⁽¹⁾
2	2.5 inH ₂ O (6,2 mbar)	250 inH ₂ O (0,62 bar)	-250 inH ₂ O (-0,62 bar)	-250 inH ₂ O (-0,62 bar)
3	10 inH ₂ O (24,9 mbar)	1000 inH ₂ O (2,49 bar)	-1000 inH ₂ O (-2,49 bar)	-393 inH ₂ O (-979 mbar)
4	3 psi (0,20 bar)	300 psi (20,6 bar)	-300 psi (-20,6 bar)	-14.2 psig (979 mbar)
5	20 psi (1,38 bar)	2000 psi (137,9 bar)	N/A	N/A

(1) Assumes atmospheric pressure of 14.7 psig.

Table 21: Rosemount 2051L

Range	Minimum span	Range and sensor limits		
		Upper (URL)	Lower (LRL)	
			Rosemount 2051L Differential	Rosemount 2051L Gage ⁽¹⁾
2	2.5 inH ₂ O (6,2 mbar)	250 inH ₂ O (0,62 bar)	-250 inH ₂ O (-0,62 bar)	-250 inH ₂ O (-0,62 bar)
3	10 inH ₂ O (24,9 mbar)	1000 inH ₂ O (2,49 bar)	-1000 inH ₂ O (-2,49 bar)	-393 inH ₂ O (-979 mbar)
4	3 psi (0,207 bar)	300 psi (20,6 bar)	-300 psi (-20,7 bar)	-14.2 psig (-979 mbar)

(1) Assumes atmospheric pressure of 14.7 psig.

Service

Liquid, gas, and vapor applications

Protocols

4–20 mA (output code A)

Output

Two-wire 4–20 mA, user-selectable for linear or square root output. Digital process variable superimposed on 4–20 mA signal, available to any host that conforms to the HART[®] protocol.

Power supply

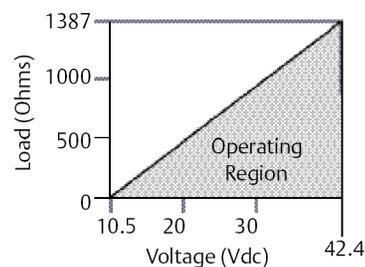

External power supply required. Standard transmitter (4–20 mA) operates on 10.5 to 42.4 Vdc with no load. The Rosemount™ 3051S ERS System operates on 16 to 42.4 Vdc with no load.

Load limitations

Maximum loop resistance is determined by the voltage level of the external power supplied as described by:

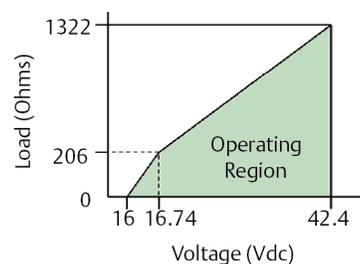

Figure 10: Standard HART Transmitter

Maximum Loop Resistance = $43.5 * (\text{Power supply voltage} - 10.5)$

The Field Communicator requires a minimum loop resistance of 250Ω for communication.

Figure 11: Rosemount 3051S ERS System

If supply voltage ≤ 16.74 Vdc:

Maximum Loop Resistance = $277 * (\text{Power supply voltage} - 16.0)$

If supply voltage > 16.74 Vdc:

Maximum Loop Resistance = $43.5 * (\text{Power supply voltage} - 12.0)$

The Field Communicator requires a minimum loop resistance of 250Ω for communication.

FOUNDATION™ Fieldbus (output code F)

Power supply

External power supply required; transmitters operate on 9.0 to 32.0 Vdc transmitter terminal voltage.

Current draw

17.5 mA for all configurations (including LCD display option)

Indication

Optional two-line LCD display

FOUNDATION Fieldbus function block execution times

Block	Execution time (milliseconds)		
	3051SAL_C	3051L	2051L
Resource	N/A	N/A	N/A
Transducer	N/A	N/A	N/A
LCD Block	N/A	N/A	N/A
Analog Input 1, 2	20	30	35
PID	35 ⁽¹⁾	45	45
Input Selector	20	30	30
Arithmetic	20	35	35
Signal Characterizer	20	40	40
Integrator	20	35	35
Output Splitter	20	N/A	N/A
Control Selector	20	N/A	N/A

(1) *PID with Auto-tune.*

FOUNDATION Fieldbus parameters

Schedule entries: 7 (max.)

Links: 20 (max.)

Virtual Communications Relationships (VCR): 12 (max.)

Standard function blocks

Resource block

Contains hardware, electronics, and diagnostic information.

Transducer block

Contains actual sensor measurement data including the sensor diagnostics and the ability to trim the pressure sensor or recall factory defaults.

LCD block

Configures the local display.

Two analog input blocks

Processes the measurements for input into other function blocks. The output value is in engineering units or custom and contains a status indicating measurement quality.

PID block

Contains all logic to perform PID control in the field including cascade and feedforward.

Backup Link Active Scheduler (LAS)

The transmitter can function as a Link Active Scheduler if the current link master device fails or is removed from the segment.

Advanced control function block suite (option code A01)

Input selector block

Selects between inputs and generates an output using specific selection strategies such as minimum, maximum, midpoint, average, or first “good.”

Arithmetic block

Provides pre-defined application-based equations including flow with partial density compensation, electronic remote seals, hydrostatic tank gauging, ratio control, and others.

Signal characterizer block

Characterizes or approximates any function that defines an input/output relationship by configuring up to twenty X, Y coordinates. The block interpolates an output value for a given input value using the curve defined by the configured coordinates.

Integrator block

Compares the integrated or accumulated value from one or two variables to pre-trip and trip limits and generates discrete output signals when the limits are reached. This block is useful for calculating total flow, total mass, or volume over time.

FOUNDATION™ Fieldbus diagnostics suite (option code D01)

The FOUNDATION Fieldbus Diagnostics provide Abnormal Situation Prevention (ASP) indication. The integral statistical process monitoring (SPM) technology calculates the mean and standard deviation of the process variable 22 times per second. The Rosemount 3051S_L and 3051L use these values and highly flexible configuration options for customization to detect many user-defined or application specific abnormal situations (e.g. detecting plugged impulse lines and fluid composition change).

PROFIBUS® PA (output code W)

Profile version

3.02

Power supply

External power supply required; transmitters operate on 9.0 to 32.0 Vdc transmitter terminal voltage.

Current draw

17.5 mA for all configurations (including LCD display option)

Output update rate

Four times per second

Standard function blocks

Analog input (AI block)

The AI function block processes the measurements and makes them available to the host device. The output value from the AI block is in engineering units and contains a status indicating the quality of the measurement.

Physical block

The physical block defines the physical resources of the device including type of memory, hardware, electronics, and diagnostic information.

Transducer block

Contains actual sensor measurement data including the sensor diagnostics and the ability to trim the pressure sensor or recall factory defaults.

Indication

Optional two-line LCD display

Local Operator Interface

Optional external configuration buttons

Rosemount 3051SAL_C Wireless self-organizing networks

Output

IEC 62591 (*WirelessHART*®), 2.4 GHz DSSS

Radio frequency power output from antenna

External antenna (WK option): Maximum of 10 mW (10 dBm) EIRP

Extended range, external antenna (WM option): Maximum of 18 mW (12.5 dBm) EIRP

High-gain, remote antenna (WN option): Maximum of 40 mW (16 dBm) EIRP

Local display

The optional seven-digit LCD display can display primary variable in engineering units, percent of range, sensor module temperature, and electronics temperature. Display updates at update rate up to once per minute. The display updates based on the wireless update rate.

Update rate

User selectable 1 second to 60 minutes.

Power module

Field replaceable, keyed connection eliminates the risk of incorrect installation, Intrinsically Safe Lithium-thionyl chloride Power Module with polybutadine terephthalate (PBT) enclosure. Ten-year life at one-minute update rate.

Note

Reference conditions are 70 °F (21 °C), and routing data for three additional network devices. Continuous exposure to ambient temperature limits of –40 °F or 185 °F (–40 °C or 85 °C) may reduce specified life by less than 20 percent.

Overpressure limits

Limit is 0 psia to the flange rating or sensor rating, whichever is lower.

Table 22: Rosemount 3051L, 2051L, and Level Flange Rating Limits

Standard	Type	CS Rating	SST Rating
ASME	Class 150	285 psig	275 psig
ASME	Class 300	740 psig	720 psig
ASME	Class 600	1480 psig	1440 psig
At 100 °F (38 °C), the rating decreases with increasing temperature, per ASME B16.5.			
DIN	PN 10–40	40 bar	40 bar
DIN	PN 10/16	16 bar	16 bar
DIN	PN 25/40	40 bar	40 bar
At 122 °F (50 °C), the rating decreases with increasing temperature per EN 1092-1 Annex F.			

Temperature limits

Ambient

–40 to 185 °F (–40 to 85 °C) With LCD display⁽¹⁾: –40 to 175 °F (–40 to 80 °C) With option code P0: –20 to 185 °F (–29 to 85 °C)

Storage

–50 to 185 °F (–46 to 85 °C) With LCD display: –40 to 185 °F (–40 to 85 °C) With wireless output: –40 to 185 °F (–40 to 85 °C)

Process

Table 23: Rosemount 3051SAM ERS Process temperature Limits (Gage/Absolute Sensor)

Configuration	Coplanar gage/absolute sensor (Rosemount 3051SAM__G, 3051SAM__A)	In-line gage sensor/absolute sensor (Rosemount 3051SAM__T, 3051SAM__E)
Silicone fill fluid ⁽¹⁾	N/A	–40 to 250 °F (–40 to 121 °C) ⁽³⁾
with coplanar flange ⁽²⁾	–40 to 250 °F (–40 to 121 °C) ⁽³⁾	N/A
with traditional flange ⁽²⁾	–40 to 300 °F (–40 to 149 °C) ⁽³⁾	N/A
with level flange ⁽²⁾	–40 to 300 °F (–40 to 149 °C) ⁽³⁾	N/A
with Rosemount 305 Integral Manifold ⁽²⁾	–40 to 300 °F (–40 to 149 °C) ⁽³⁾	N/A
Inert fill fluid ⁽²⁾⁽⁴⁾	–40 to 185 °F (–40 to 85 °C) ⁽⁵⁾	–22 to 250 °F (–30 to 121 °C) ⁽³⁾

- (1) Process temperatures above 185 °F (85 °C) require de-rating the ambient limits by a 1.5:1 ratio. For example, for process temperature of 195 °F (91 °C), new ambient temperature limit is equal to 170 °F (77 °C). This can be determined as follows: $(195\text{ °F} - 185\text{ °F}) \times 1.5 = 15\text{ °F}$, $185\text{ °F} - 15\text{ °F} = 170\text{ °F}$.
- (2) Process temperatures above 185 °F (85 °C) require de-rating the ambient limits by a 1:1 ratio.
- (3) 220 °F (104 °C) limit in vacuum service; 130 °F (54 °C) for pressures below 0.5 psia.
- (4) Not available with Rosemount 3051SAM__A.
- (5) 160 °F (71 °C) limit in vacuum service.

Fill fluid specifications

Note

Temperature limits are reduced in vacuum service. For more information on fill fluids see Rosemount DP Level Fill Fluid Specification [Technical Note](#).

Table 24: Fill Fluid Specifications

- (1) Temperature limits are reduced in vacuum service. For more information on fill fluids see Rosemount DP Level Fill Fluid Specification [Technical Note](#).
- (2) Due to heat transfer to the transmitter, the maximum process temperature of the transmitter will be de-rated if ambient or process temperatures exceed 185 °F (85 °C). Consult Instrument Toolkit to verify the application.
- (3) Only available with Thermal Range Expander.
- (4) Not suitable for vacuum applications.
- (5) This is a food grade fill fluid.

Humidity limits

0–100 percent relative humidity

Turn-on time

Rosemount 3051SAL_C	Performance within specifications less than 2.0 seconds after power is applied to the transmitter.
Rosemount 3051L	Performance within specifications less than 2.0 seconds (10.0 s for PROFIBUS protocol) after power is applied to the transmitter
Rosemount 2051L	Performance within specifications less than 2.0 seconds after power is applied to the transmitter.
Rosemount ERS System	Performance within specifications less than 6.0 seconds after power is applied.

Volumetric displacement

Less than 0.005-in³ (0.08 cm³)

Damping

Software damping is in addition to sensor module response time.

Note

Does not apply to wireless option code X.

Rosemount 3051SAL_C	Analog output response to a step change is user-selectable from 0 to 60 seconds for one time constant.
Rosemount 3051L	Analog output response to a step input change is user-selectable from 0 to 36 seconds for one time constant.
Rosemount 2051L	Analog output response to a step input change is user-selectable from 0 to 25.6 seconds for one time constant.
Rosemount ERS System	The PHI and PLO pressure measurements and the DP calculation may be independently dampened from 0 to 60 seconds for one time constant.

Physical specifications**Material selection**

Emerson provides a variety of Rosemount products with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser's sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options, and components for the particular application. Emerson is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

Electrical connections

½–14 NPT, PG 13.5, G½, and M20 × 1.5 conduit. HART interface connections fixed to terminal block.

Non-wetted parts

Transmitter flange is CF-3M (cast version of 316L SST, material per ASTM-A743)

Capillary tube is 316L SST

Capillary armor is SST or PVC coated SST

Rosemount 1199 Seal specifications

Functional specifications

Hygienic seal approvals

3-A

The following seals are 3-A[®] approved and labeled:

- SCW (Tri-Clover style Tri-Clamp seal)
- STW (Thin wall tank spud seal)
- EES Flanged Tank spud extended seal
- VCS (In-line Tri-Clover style Tri-Clamp seal)
- SVS (Tuchenhagen VARIVENT[®] compatible seal)
- SHP (Cherry-Burrell[®] "I" line style seal)
- SLS (Dairy process connection - female thread)

EHEDG (Type EL Class I)

The following seals are EHEDG Type EL Class I approved and labeled:

- SCW (Tri-Clover style Tri-Clamp seal)
- VCS (In-line Tri-Clover style Tri-Clamp seal)
- SVS (Tuchenhagen VARIVENT compatible seal)
- SLS (Dairy process connection - female thread)

Ensure gasket selected for installation is approved to meet both application and EHEDG certification requirements.

Hygienic fill fluids

The hygienic fill fluids glycerin and water and Propylene Glycol and water meet United States Pharmacopeia(USP) and Food Chemical Codex (FCC) requirements and is Generally Recognized as Safe (GRAS) in accordance with the FDA Code of Federal Regulations Title 21. The hygienic fill fluid Neobee M-20 is approved under 21CFR 172.856 as a direct food additive and under 21 CFR 174.5 as an indirect food additive. Tri-Therm 300 is registered by NSF as meeting FDA 21 CFR regulatory requirements and is acceptable for use where there is possibility of incidental food contact (HT 1).

Hygienic O-rings

The EPDM, Fluorocarbon (FMK), and Nitrilebutadiene (NBR) O-rings for the SSW Tank Spud Seal meet 3-A Hygienic Standard Number 18 Class 1 requirements. The EPDM O-ring also meets USP Class VI approval requirements.

Transmissible Spongiform Encephalopathy (TSE) Declaration

Emerson certifies no process wetted components used in hygienic seal products contain substances of animal origin. Materials used in the production or processing of wetted components for hygienic seals meet the requirements stated in EMA/410/01 Rev. 3 and ISO 22442-1:2015. Wetted components in hygienic seals are considered free of TSE.

Surface finish certification (Q16 option)

When ordering the Q16 option in the pressure transmitter model number, the surface finish of the seal diaphragm is certified per BPE 2002 requirements. This surface finish certification is available for Tri Clamp, Tri Clamp Inline, Tank Spud, and Thin Wall Tank Spud seal types.

NACE Standard (Q15 or Q25 option)

NACE (National Association of Corrosion Engineers) standard MR0175/ISO 15156 defines metallic material requirements for resistance to sulfide stress cracking when applied on petroleum production, drilling, gathering and flow line equipment, and field processing facilities to be used in H₂S bearing hydrocarbon service. MR0103 provides material requirements exclusive to sour petroleum refining environments. Compliance guidelines are intended to include "wetted" materials as recommended by both

NACE standards. The option code T in several of the general purpose seal types limits the wetted material offering. Metallurgical requirements for alloys used are virtually identical for the two standards, but application conditions enforced are different and can limit material acceptance. Contact an Emerson representative to aid in selecting the proper materials to meet the NACE standard.

Material traceability (Q8 Option)

Material traceability is provided for the seal, upper housing, and if applicable, lower housing/flushing connection or diaphragm extension, upon selecting the option code Q8 in the pressure transmitter model number. Material traceability for the transmitter/seal system is provided per the DIN EN10204 3.1 standard, and is only available for general purpose seal types.

Performance specifications

For zero-based spans, reference conditions, silicone oil fill, glass-filled PTFE O-rings, SST materials, coplanar flange (Rosemount 3051SMV, 3051S_C) or ½–14 NPT (Rosemount 3051S_T) process connections, digital trim values set to equal range points.

Remote seal system performance calculation report (QZ Option)

Instrument Toolkit™ calculates the remote seal system performance and validates model number configuration.

When the QZ option code is specified within the pressure transmitter model structure, Emerson will generate a remote seal system calculation report for the given application. This report quantifies all aspects of remote seal system performance including seal temperature effects, head temperature effects, seal response time, and transmitter total probable error.

Physical specifications

Material selection

Emerson provides a variety of Rosemount products with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser's sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options, and components for the particular application. Emerson is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

Tagging

The Rosemount 1199 Remote Seal model number is marked on the transmitter nameplate (neck or top label). The pressure transmitter will be tagged in accordance with customer requirements. The standard stainless steel tag is wired to the transmitter. Tag is 0.02-in. (0.051 cm) thick with 0.125-in. (0.318 cm) high letters. A permanently attached tag is available upon request.

Calibration

Transmitters are factory calibrated to customer's specified range. If calibration is not specified, then the transmitters are calibrated at maximum range. Calibration is performed at ambient temperature and pressure.

Product certifications

Rosemount 3051S/3051SFx/3051S-ERS

Rev 2.7

European Directive Information

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

Ordinary Location Certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Installing Equipment in North America

The US National Electrical Code® (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

USA

Table 31: Process Temperature

Temperature class	Process temperature
T6	-60 °C to +70 °C
T5	-60 °C to +80 °C
T4	-60 °C to +120 °C

Special Conditions for Safe Use (X):

1. This device contains a thin wall diaphragm less than 1 mm thickness that forms a boundary between Category 1 (process connection) and Category 2 (all other parts of the equipment). The model code and datasheet are to be consulted for details of the diaphragm material. Installation, maintenance and use shall take into account the environmental conditions

to which the diaphragm will be subjected. The manufacturer's instructions for installation and maintenance shall be followed in detail to assure safety during its expected lifetime.

2. Flameproof joints are not intended for repair.
3. Non-standard paint options may cause risk from electrostatic discharge. Avoid installations that could cause electrostatic build-up on painted surfaces, and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.
4. Appropriate cable, glands and plugs need to be suitable for a temperature of 5 °C greater than maximum specified temperature for location where installed.

产品安全使用特殊条件

- 证书编号后缀“X”表明产品具有安全使用特殊条件: 涉及隔爆接合面的维修须联系产品制造商。
- 产品使用注意事项
 1. 用于爆炸性气体环境中, 产品使用环境温度与温度组别和介质温度的关系为:

温度组别	环境温度	过程温度
T6	$-60\text{ °C} \leq T_a \leq +70\text{ °C}$	$-60\text{ °C} \leq T_a \leq +70\text{ °C}$
T5	$-60\text{ °C} \leq T_a \leq +80\text{ °C}$	$-60\text{ °C} \leq T_a \leq +80\text{ °C}$
T4	$-60\text{ °C} \leq T_a \leq +80\text{ °C}$	$-60\text{ °C} \leq T_a \leq +120\text{ °C}$

2. 用于爆炸性粉尘环境中, 产品使用环境温度为: $-20\text{ °C} \leq T_a \leq +85\text{ °C}$
3. 产品外壳设有接地端子, 用户在使用时应可靠接地。
4. 安装现场应不存在对产品外壳有腐蚀作用的有害气体。
5. 现场安装时, 电缆引入口须选用国家指定的防爆检验机构按检验认可, 具有 Ex d IIC, Ex tD A20 IP66 防爆等级的电缆引入装置或堵封件, 冗余电缆引入口须用堵封件有效密封。
6. 用于爆炸性气体环境中, 现场安装, 使用和维护必须严格遵守“断电后开盖!”的警告语。用于爆炸性粉尘环境中, 现场安装, 使用和维护必须严格遵守“爆炸性粉尘场所严禁开盖!”的警告语。
7. 用于爆炸性粉尘环境中, 产品外壳表面需保持清洁, 以防粉尘堆积, 但严禁用压缩空气吹扫。
8. 用户不得自行更换该产品的零部件, 应会同产品制造商共同解决运行中出现的故障, 以杜绝损坏现象的发生。
9. 产品的安装, 使用和维护应同时遵守产品使用说明书, GB3836.13-2013“爆炸性环境 第 13 部分: 设备的修理, 检修, 修复和改造”, GB3836.15-2000“爆炸性气体环境用电气设备 第 15 部分: 危险场所电气安装 (煤矿除外)”, GB3836.16-2006“爆炸性气体环境用电气设备 第 16 部分: 电气装置的检查和维护 (煤矿除外)”, GB50257-2014“电气装置安装工程爆炸和火灾危险环境电力装置施工及验收规范”和 GB15577-2007“粉尘防爆安全规程”, GB12476.2-2010“可燃性粉尘环境用电气设备 第 2 部分: 选型和安装”的有关规定。

产品安全使用特殊条件:

- 证书编号后缀“X”表明产品具有安全使用特殊条件:
 1. 产品外壳含有轻金属,用于 0 区时需注意防止由于冲击或摩擦产生的点燃危险.
 2. 当选择 T1 瞬态抑制端子时,此设备不能承受 GB3836.4-2010 标准中第 6.3.12 条规定的 500V 交流有效值试验电压的介电强度试验.
 3. Transmitter output 为 X 时,天线表面电阻大于 1 GΩ,为了避免静电积聚,不允许用溶剂或者干布擦拭;电源模块表面电阻大于 1 GΩ,如果在危险区域更换,则需要避免静电积聚;只能使用由原制造厂提供的 P/N 753-9220-XXXX 电池.
- 产品使用注意事项:
 1. 产品使用环境温度为:
 - 用于爆炸性气体环境中,产品使用环境温度为: $-60^{\circ}\text{C} \leq \text{Ta} \leq +70^{\circ}\text{C}$
 - 用于爆炸性粉尘环境中,产品使用环境温度为: $-20^{\circ}\text{C} \leq \text{Ta} \leq +85^{\circ}\text{C}$

注: 本安电气参数符合 GB3836.19-2010 对 FISCO 现场仪表的参数要求。

- 选择 Remote Mount 选项 M7, M8, M9 时, 电缆分布电容小于 24nF, 分布电感小于 60 μ H。
- 该产品必须与已通过防爆认证的关联设备配套共同组成本安防爆系统方可用于爆炸性气体环境。其系统接线必须同时遵守本产品 and 所配关联设备的使用说明书要求, 接线端子不得接错。
- 用户不得自行更换该产品的零部件, 应会同产品制造商共同解决运行中出现的故障, 以杜绝损坏现象的发生。
- 用于爆炸性粉尘环境中, 电缆引入口须选用国家指定的防爆检验机构按检验认可, 具有 Ex tD A20 IP66 防爆等级的电缆引入装置或堵封件, 冗余电缆引入口须用堵封件有效密封。
- 产品的安装, 使用和维护应同时遵守产品使用说明书, GB3836.13-2013 “爆炸性环境 第 13 部分: 设备的修理, 检修, 修复和改造”, GB3836.15-2000 “爆炸性气体环境用电气设备 第 15 部分: 危险场所电气安装 (煤矿除外)”, GB3836.16-2006 “爆炸性气体环境用电气设备 第 16 部分: 电气装置的检查和维修 (煤矿除外)”, GB3836.18-2010 “爆炸性环境 第 18 部分: 本质安全系统” 和 GB50257-2014 “电气装置安装工程爆炸和火灾危险环境电力装置施工及验收规范” 和 GB15577-2007 “粉尘防爆安全规程”, GB12476.2-2010 “可燃性粉尘环境用电气设备 第 2 部分”: 选型和安装的有关规定。

产品安全使用特殊条件

- 产品防爆合格证号后缀“X”代表产品安全使用有特殊条件: 产品选用瞬态保护端子板 (c 中包含 T1 选项) 时, 设备不能承受 500V 对地电压试验 1 分钟, 安装时需考虑在内。
- 产品使用注意事项
 - 产品使用环境温度范围为: $-40^{\circ}\text{C} \leq T_a \leq +85^{\circ}\text{C}$
 - 最高输入电压: 45V
 - 现场安装时, 电缆引入口须选用经国家指定的防爆检验机构检验认可的, 具有 Ex eIIC Gb 或 Ex nA IIC Gc 防爆等级的电缆引入装置或堵封件, 冗余电缆引入口须用堵封件有效密封。
 - 安装现场确认无可燃性气体存在时方可维修。
 - 用户不得自行更换该产品的零部件, 应会同产品制造商共同解决运行中出现的故障, 以杜绝损坏现象的发生。
 - 产品的安装, 使用和维护应同时遵守产品使用说明书, GB3836.13-2013 “爆炸性环境 第 13 部分: 设备的修理, 检修, 修复和改造”, GB3836.15-2000 “爆炸性气体环境用电气设备 第 15 部分: 危险场所电气安装 (煤矿除外)”, GB3836.16-2006 “爆炸性气体环境用电气设备 第 16 部分: 电气装置的检查和维修 (煤矿除外)”, GB50257-2014 “电气装置安装工程爆炸和火灾危险环境电力装置施工及验收规范” 的有关规定。

Special Conditions for Safe Use:

1. This device contains a thin wall diaphragm less than 1mm thickness that forms a boundary between EPL Ga (process connection) and EPL Gb (all other parts of the equipment). The model code and datasheet are to be consulted for details of the diaphragm material. Installation, maintenance, and use shall consider the environmental conditions to which the diaphragm will be subjected. The manufacturer’s instructions for installation and maintenance shall be followed in detail to assure safety during its expected lifetime.
2. Flameproof joints are not intended for repair.
3. Non-standard paint options may cause risk from electrostatic discharge. Avoid installations that could cause electrostatic build-up on painted surfaces, and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

European directive information

A copy of the EC Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EC Declaration of Conformity can be found at [Emerson.com/Rosemount](https://www.emerson.com/Rosemount).

Telecommunication Compliance

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification.

Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

FCC and IC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation. This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

Ordinary location certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Installing Equipment in North America

The US National Electrical Code (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

----	------------------

Special Conditions for Safe Use (X):

1. This device contains a thin wall diaphragm less than 1 mm thick that forms a boundary between EPL Ga (process connection) and EPL Gb (all other parts of the equipment). The model code and datasheet are to be consulted for details of the diaphragm material. During installation, maintenance, and use the environmental conditions to which the diaphragm will be subjected shall be taken into account. The manufacturer's instructions for installation and maintenance shall be followed in detail to assure safety during its expected lifetime.
2. Flameproof joints are not intended for repair.
3. Non-standard paint options may cause risk from electrostatic discharge. Avoid installations that could cause electrostatic build-up on painted surfaces, and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.
4. Some variants of the equipment have reduced markings on the nameplate. Refer to the Certificate for full equipment marking.

European directive information

A copy of the EC Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EC Declaration of Conformity can be found at www.Emerson.com.

Ordinary Location Certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Hazardous location certifications

Note

Device ambient temperature ratings and electrical parameters may be limited to the levels dictated by the hazardous location certificate parameters.

North America

E5 USA Explosionproof (XP) and Dust-Ignitionproof (DIP)

Special Conditions for Safe Use (X):

1. The device contains a thin wall diaphragm. Installation, maintenance and use shall take into account the environmental conditions to which the diaphragm will be subjected. The manufacturer's instructions for installation and maintenance shall be followed in detail to assure safety during its expected lifetime.
2. Flameproof joints are not intended for repair.
3. Non-standard paint options may cause risk from electrostatic discharge. Avoid installations that could cause electrostatic build-up on painted surfaces, and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

I2 INMETRO Intrinsic Safety

Certificate:	UL-BR 14.0759X
Standards:	ABNT NBR IEC 60079-0:2013; ABNT NBR IEC 60079-11:2013
Markings:	Ex ia IIC T4 Ga ($-60\text{ °C} \leq T_a \leq +70\text{ °C}$)

Rev 1.8

European directive information

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at [Emerson.com/Rosemount](https://www.emerson.com/Rosemount).

Telecommunication compliance

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification. Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

FCC and IC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation. This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

Ordinary location certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Installing in North America

The US National Electrical Code (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

Dimensions are in inches (millimeters).

Table 77: VCS Tri-Clamp In-Line Seal Dimensions

Pipe size	Inner diameter "A" in. (mm)	Groove diameter "B" in. (mm)	Flange diameter "C" in. (mm)	Outer diameter "D" in. (mm)	Weight lb (kg)
1-in.	0.88 (22)	1.72 (44)	1.99 (51)	2.33 (59)	2.67 (1,20)
1½-in.	1.37 (35)	1.72 (44)	1.99 (51)	2.73 (69)	2.69 (1,21)
2-in.	1.87 (48)	2.22 (56)	2.52 (64)	3.19 (81)	3.43 (1,54)
3-in.	2.87 (73)	3.28 (83)	3.58 (91)	4.14 (105)	4.76 (2,14)
4-in.	3.82 (97)	4.35 (110)	4.69 (119)	5.06 (129)	6.24 (2,81)

Figure 50: SVS VARIVENT Compatible Connection Seal

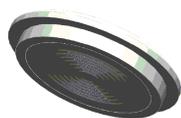

- A. Connection to transmitter
- B. Diaphragm

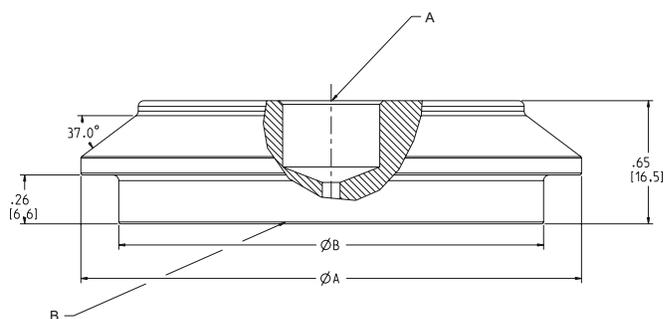

Weight = 1.13 lb (0,51 kg)

Dimensions are in inches (millimeters).

Figure 51: SHP Cherry-Burrell “I” Line Seal

- A. Connection to transmitter
B. Diaphragm

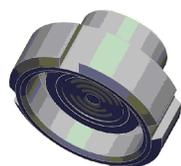

Dimensions are in inches (millimeters).

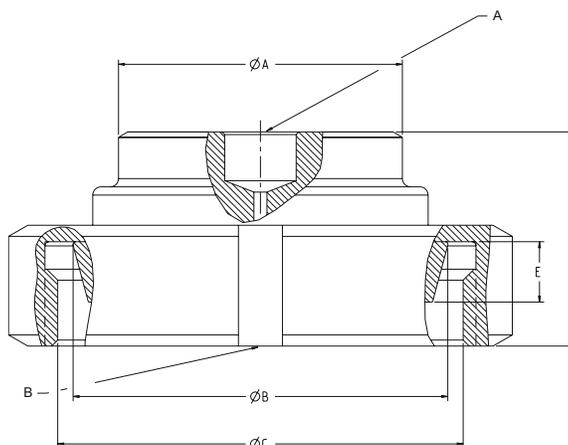

Table 78: SHP Cherry-Burrell “I” Line Seal Dimensions

Size	Outer diameter “A” in. (mm)	Extension diameter “B” in. (mm)	Weight lb (kg)
2-in.	2.64 (67)	2.24 (57)	0.74 (0,33)
3-in.	3.88 (98)	3.31 (84)	1.76 (0,79)

Figure 52: SLS Hygienic Dairy Process Connection Female Thread Seal per DIN 11851

- A. Connection to transmitter
B. Diaphragm

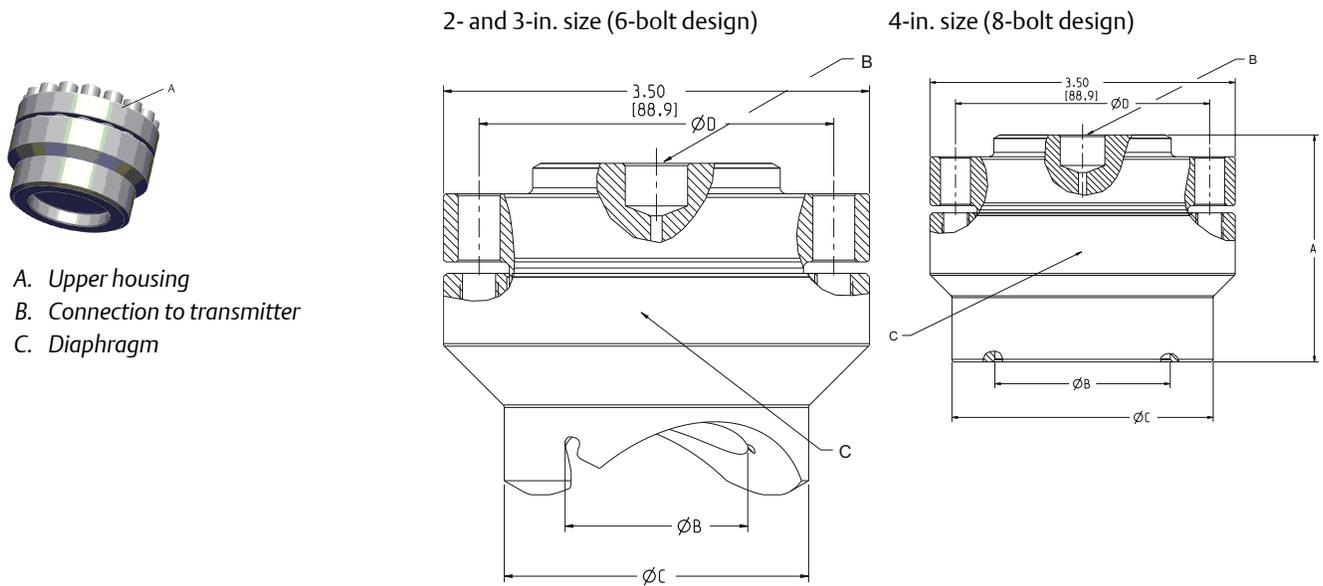

Dimensions are in inches (millimeters)

Table 79: SLS Hygienic Dairy Process Connection Female Thread Seal per DIN 11851 Dimensions

Female thread	Process size/ rating	Hub diameter “A” in. (mm)	“B” in. (mm)	Thread diameter “C” in. (mm)	Hub height “D” in. (mm)	“E” in. (mm)	Weight lb (kg)
DIN 11851	DN 40 PN 40	1.89 (48)	2.20 (56)	Rd 65 x 1/6-in.	1.18 (30)	0.39 (10)	1.61 (0,72)
	DN 50 PN 25	2.40 (61)	2.70 (69)	Rd 78 x 1/6-in.	1.22 (31)	0.43 (11)	2.32 (1,04)

Figure 53: WSP Saddle Seal

Dimensions are in inches (millimeters).

Table 80: WSP Saddle Seal Dimensions

Size	Overall height "A" in. (mm)	Inner diameter "B" in. (mm)	Outer diameter "C" in. (mm)	Bolt circle diameter "D" in. (mm)	
				6-Bolt	8-Bolt
2-in.	2.72 (69)	1.50 (38)	2.50 (64)	2.99 (76)	2.91 (74)
3-in.	2.46 (63)	2.01 (51)	3.02 (77)	2.99 (76)	2.91 (74)
4-in. and larger	2.60 (66)	2.01 (51)	3.00 (76)	2.99 (76)	2.91 (74)

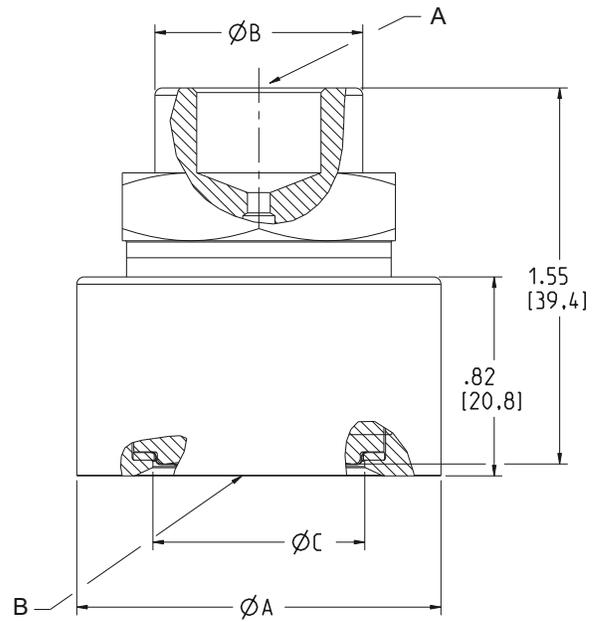

Table 81: WSP Saddle Seal Weights

Pipe size	Class	Weights lb (kg)
ASME		
2-in.	1250 psig	4.61 (2,09)
	1500 psig	4.63 (2,10)
3-in.	1250 psig	4.36 (1,98)
	1500 psig	4.38 (1,99)
4-in.	1250 psig	5.46 (5,48)
	1500 psig	5.60 (2,54)

Figure 54: UCP Threaded Type Seal

- A. Connection to transmitter
- B. Diaphragm

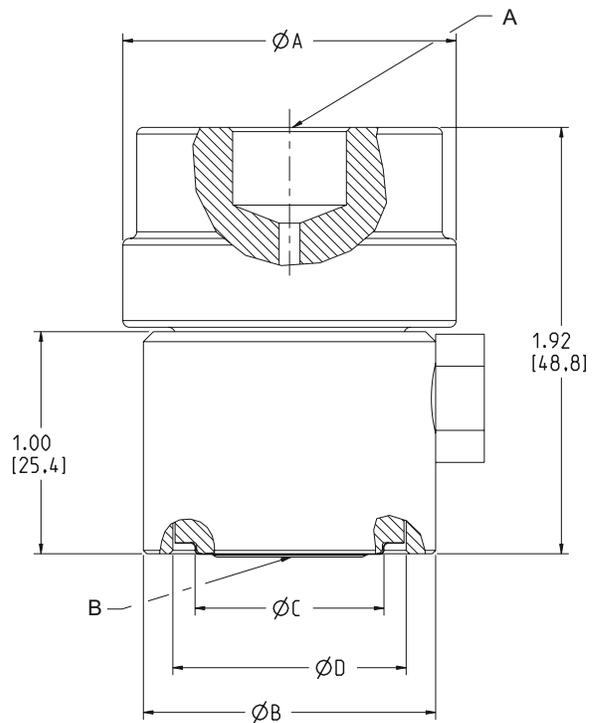

Weight = 1.33 lb (0,60 kg)
 Dimensions are in inches (millimeters).

Figure 55: PMW Sleeve Type Seal

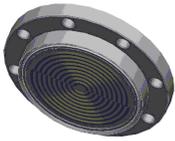

- A. Connection to transmitter
- B. Diaphragm

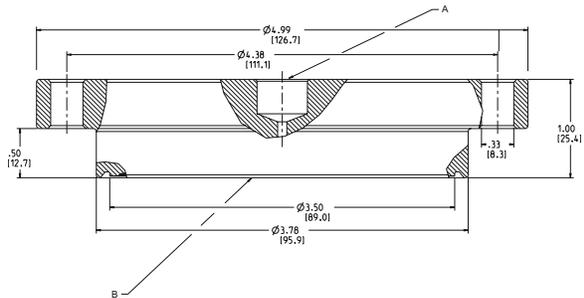

Weight = 0.77 lb (0,35 kg)
 Dimensions are in inches (millimeters).

Figure 56: CTW Chemical Tee Seal

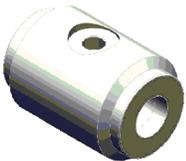

- A. Connection to transmitter
- B. Diaphragm

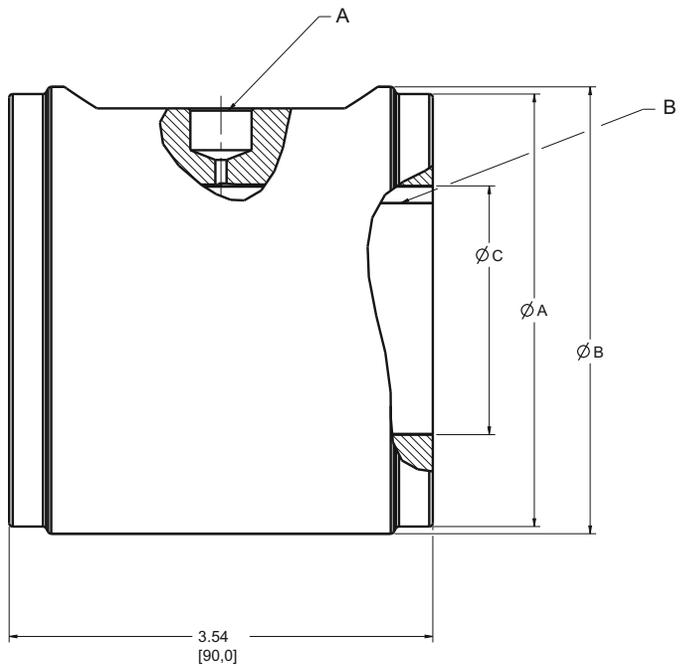

Weight = 4.18 lb (1,88 kg)

Dimensions are in inches (millimeters).

Figure 57: TFS Wafer Style In-Line Seal

- A. Connection to transmitter
- B. Diaphragm

Dimensions are in inches (millimeters).

Table 82: TFS Wafer Style In-Line Seal Dimensions

Pipe size	Flange face diameter "A" in. (mm)	Outer diameter "B" in. (mm)	Inner diameter "C" in. (mm)	Weight lb (kg)
1-in.	2.00 (51)	2.64 (67)	1.090 (28)	3.91 (1,76)
1½-in.	2.88 (73)	3.23 (82)	1.61 (41)	5.73 (2,58)
2-in.	3.62 (92)	3.74 (95)	2.07 (52)	7.42 (3,34)
3-in.	5.00 (127)	5.00 (127)	3.07 (78)	12.20 (5,49)
4-in.	6.19 (157)	6.19 (157)	4.00 (102)	17.56 (7,90)
DN25	2.68 (68)	2.72 (69)	1.09 (28)	4.76 (2,14)

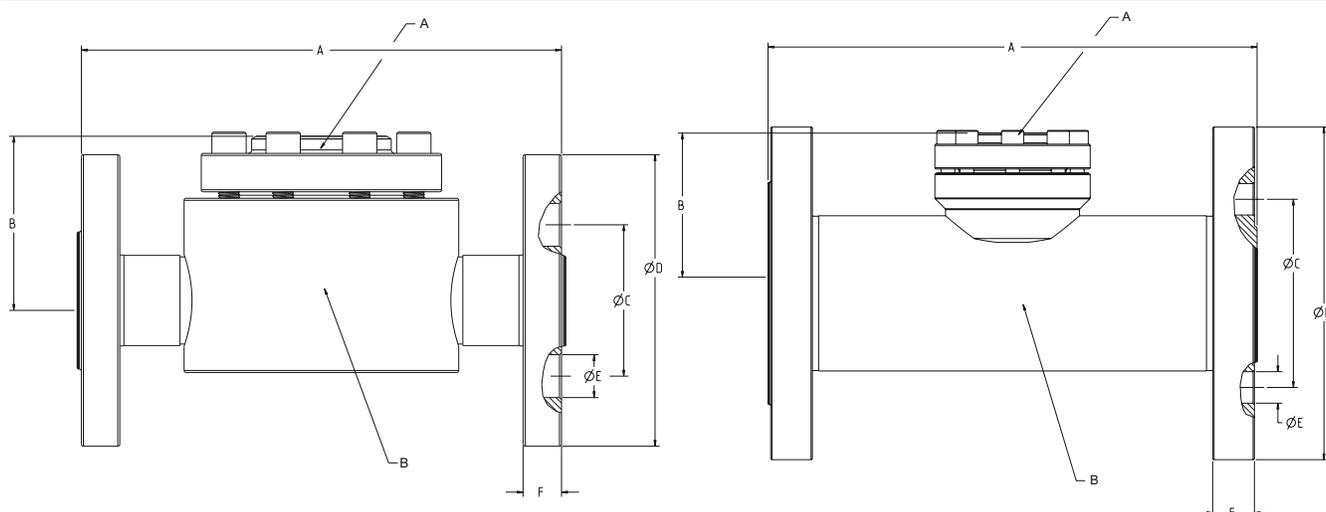

Table 82: TFS Wafer Style In-Line Seal Dimensions (continued)

Pipe size	Flange face diameter "A" in. (mm)	Outer diameter "B" in. (mm)	Inner diameter "C" in. (mm)	Weight lb (kg)
DN40	3.46 (88)	3.46 (88)	1.61 (41)	7.35 (3,31)
DN50	4.02 (102)	4.09 (104)	1.99 (51)	9.97 (4,49)
DN80	5.43 (138)	5.47 (139)	3.24 (82)	15.24 (6,86)
DN100	6.38 (162)	6.46 (164)	4.22 (107)	18.69 (8,41)

Figure 58: WFW Flow-Thru Flanged Seal

1-in. size

2- and 3-in. sizes

A. Connection to transmitter

B. Diaphragm

Dimensions are in inches (millimeters).

Table 83: WFW Flow-Thru Flanged Seal Dimensions

Nominal pipe size	ASME class	Overall length "A" in. (mm)	Upper to centerline height "B" in. (mm)	Bolt circle diameter "C" in. (mm)	Outside diameter "D" in. (mm)	Bolt hole diameter "E" in. (mm)	Flange thickness "F" in. (mm)	Weight lb (kg)
1-in.	150	7.00 (178)	2.40 (61)	3.12 (79)	4.25 (108)	0.62 (16)	0.50 (13)	11.80 (5,31)
2-in.		9.00 (229)	3.31 (84)	4.75 (121)	6.00 (152)	0.75 (19)	0.69 (18)	23.66 (10,73)
3-in.		11.00 (279)	3.61 (92)	6.00 (152)	7.50 (191)	0.75 (19)	0.88 (22)	29.08 (13,09)

Table 84: Capillary and Support Tube Weights Measured per Foot (.30 m) of Capillary

Part	Weight lb (kg)
0.03-in. ID, SST armor	0.095 (0,043)
0.04-in. ID, SST armor	0.091 (0,041)
0.075-in. ID, SST armor	0.100 (0,045)
0.03-in. ID, PVC armor	0.105 (0,048)
0.04-in. ID, PVC armor	0.100 (0,045)
0.075-in. ID, PVC armor	0.110 (0,050)
Capillary adapter	0.085 (0,039)
2-in. support tube	0.035 (0,016)
4-in. support tube	0.090 (0,041)
