

Series CSM

Description

The CSM series is the companion to the CSP, covering higher pressure ranges from 30-120 psi to 2000-5000 psi. Like the CSP, it offers high proof pressure at 9000 psi along with the same range of process connections. The CSM features a zinc-plated steel fitting. Both AC and DC switching is available. Wherever customer requirements call for a quality low-cost pressure switch where size is critical in demanding environments, the new CS series is a smart choice.

Technical Specifications

Model:	{CSM1} Field Adjustable
Pressure Range (psi-bar):	{5} 75-300psi (5-21bar)
Limit Switch:	{-3} SPDT
Current Rating:	{1} 5A @ 125 VAC
Process Fitting Size:	{-4} G 1/4 (No-O-ring)
Electrical Connection:	{2} DIN #43650A
Diaphragm Material:	{B} Buna-N
